Preface	v
Acknowledgements	vii
List of contributors	ix
Abbreviations used throughout the book	xiii

SECTION 1. FUNDAMENTALS OF RENAL PHYSIOLOGY

Chapter 1 Renal haemodynamics and glomerular filtration	3
<i>David Shirley, Giovambattista Capasso and Robert Unwin</i>	
Chapter 2 Renal tubular function	10
<i>David Shirley, Giovambattista Capasso, Matthew Bailey and Robert Unwin</i>	

SECTION 2. ACUTE RENAL FAILURE — COMMON PRINCIPLES

Chapter 3 Aetiology of acute renal failure	39
<i>Andrew Allen</i>	
Chapter 4 Clinical approach and laboratory investigation	46
4.1 History and examination	47
<i>Katie Darling</i>	
4.2 Urine output and urinalysis	51
<i>Iain MacPhee</i>	
4.3 Haematological investigations	65
<i>Lawrence Goldberg</i>	
4.4 Biochemical investigations	67
<i>Lawrence Goldberg</i>	
4.5 Immunological investigations	71
<i>Megan Griffith</i>	

Chapter 5	Physiological investigation <i>Lui Forni</i>	77
Chapter 6	Imaging in acute renal failure <i>Christopher Harvey, Peter Robins and Martin Blomley</i>	93
Chapter 7	Renal biopsy in acute renal failure <i>Madhuri Warren, Mark Little and Terry Cook</i>	113
Chapter 8	Emergency consequences of acute renal failure	135
	8.1 Oliguria <i>Rick Fielding</i>	135
	8.2 Pulmonary oedema <i>Richard Thompson and Michael Robson</i>	149
	8.3 Hyperkalaemia <i>David Throssell</i>	156
	8.4 Acid-base disturbances <i>David Throssell</i>	162
	8.5 Calcium, phosphate and magnesium disturbances <i>Anthony Dorling</i>	174
	8.6 Acute uraemia <i>Rachel Hilton</i>	183
Chapter 9	Renal replacement therapy in acute renal failure	196
	9.1 Indications for renal replacement therapy <i>Paul Stevens</i>	196
	9.2 Choice of modality <i>Paul Stevens</i>	199
	9.3 Acute haemodialysis <i>Paul Stevens</i>	203
	9.4 Acute peritoneal dialysis <i>Edwina Brown</i>	223
	9.5 Continuous renal replacement therapies <i>Lui Forni</i>	231
	9.6 Vascular access <i>Richard Baker and Paul Glynne</i>	248

SECTION 3. THE DISEASES

Chapter 10	Shock and acute renal failure <i>Susan Crail and Stephen Morgan</i>	259
------------	--	-----

Chapter 11	Toxins and drugs and acute renal failure <i>Afzal Chaudhry</i>	272
Chapter 12	Rhabdomyolysis <i>Paul Glynne and Andrew Allen</i>	296
Chapter 13	Renovascular disease and cholesterol emboli <i>Graham Lord</i>	309
Chapter 14	Malignant hypertension <i>Raj Thuraisingham</i>	319
Chapter 15	Haemolytic uraemic syndrome and thrombotic thrombocytopenic purpura <i>Alan Salama</i>	328
Chapter 16	Rapidly progressive glomerulonephritis <i>Gill Gaskin</i>	341
Chapter 17	Connective tissue diseases and acute renal failure <i>Aine Burns</i>	356
Chapter 18	Acute tubulointerstitial nephritis <i>Richard Baker</i>	373
Chapter 19	Severe sepsis and acute renal failure <i>Paul Glynne and Nicholas Price</i>	388
Chapter 20	Infectious diseases and acute renal failure <i>Thomas Evans</i>	401
Chapter 21	Malignant diseases <i>Peter Choi</i>	414
Chapter 22	Myeloma and acute renal failure <i>Jeremy Levy</i>	426
Chapter 23	Renal tract obstruction and acute renal failure <i>Roger Walker</i>	437

SECTION 4. SPECIALIST SCENARIOS

Chapter 24	The renal transplant recipient <i>Anthony Warrens</i>	453
Chapter 25	The liver unit <i>Steven Holt</i>	465
Chapter 26	The haematology unit <i>Jo Thompson</i>	489

Chapter 27	The obstetric unit <i>Lucy Smyth and Liz Lightstone</i>	497
Chapter 28	The intensive care unit <i>Jeremy Cordingley and Stephen Brett</i>	510
Appendix A	Drug prescribing in acute renal failure <i>Katy Glynne</i>	529
Appendix B	Nutrition in acute renal failure <i>Marie Kelly</i>	548
Appendix C	Reference ranges	559
Index		565
