

## CONTENTS

FOREWORD	v
<i>P J Lillford</i>	
PREFACE	vii
<i>M Lal, P J Lillford, V M Naik and V Prakash</i>	
Chain-folded ap $\beta$ -sheet Lamellar Structures from Genetically-Engineered Periodic Polypeptides	1
<i>E D T Atkins</i>	
The Lipid Organisation in the Skin	19
<i>J A Bouwstra, F E R Dubbelaar, G S Gooris and M Ponc</i>	
C-13 NMR Imaging: Techniques and Applications to Materials and Biological Systems	33
<i>N Chandrakumar</i>	
Enhanced Resolution in Confocal Microscopy by Using Calculated Three-Dimensional Point Spread Functions	52
<i>M T A Bos and J H J van Opheusden</i>	
Supermolecular and Colloidal Food Structures: Novel Microscopic Approaches	71
<i>A M Hermansson</i>	
Applications of Environmental SEM to Biomaterials	86
<i>I C Bache, D J Stokes, B L Thiel and A M Donald</i>	
PHASE-FRAP: A New Frequency-domain Variant of Fluorescence Recovery after Photobleaching	96
<i>J J Birmingham</i>	
Molecular Microscopy	114
<i>V J Morris and A P Gunning</i>	

Supramolecular Structure of Proteins: Can Equilibrium be Shifted in Multimeric Proteins to Supernative Structure with Higher Stability in Certain Cosolvents?	133
<i>V Prakash, P Suryaprakash and P R Kumar</i>	
Fractal Particle Gels in Foods	157
<i>P Walstra</i>	
Particle Size Analysis of BACILLUS Spore Suspensions	174
<i>R G K Leuschner, A C Weaver, D P Ferdinando, A Darke and P J Lillford</i>	
Quantitative Analysis of Surfactant-induced Ultrastructural Changes in Skin Lipids	183
<i>M Misra and K Ananthapadmanabhan</i>	
The Extraction of Liquids from Cellular Solids — Theory and Experiment	197
<i>M Warner, S F Edwards, B L Thiel and A M Donald</i>	
Mesoscopic Physics and Functional Properties of Foods	214
<i>E van der Linden</i>	
The Rheology of Macromolecular and Supramolecular Biomaterials	224
<i>S B Ross-Murphy</i>	
The Rheology of Fibre Suspension — A Potential Mechanism of Microstructure Changes Induced by Stress Controlled Experiments	245
<i>G Cassin, I Appelqvist and I T Norton</i>	
Modelling of Milk Protein Gels by Brownian Dynamics Simulation of Aggregated Particle Networks	259
<i>S Krishna, C M Wijmans, M Whittle and E Dickinson</i>	
The Friction and Lubrication of Keratinous Biosubstrates	277
<i>M J Adams, D M Gorman, S A Johnson and B J Briscoe</i>	
Mechanical Properties of Model Composites Produced from Food Biopolymers: Influence of Biopolymer-Biopolymer Interfacial Properties	295
<i>W J Frith and I T Norton</i>	

Understanding Dry Rough Skin: A Physical Basis for the Effects of Dry Environment and Surfactant Treatment on Corneum Fracture <i>S Mukherjee, N Richardson, M Margosiak and X Lei</i>	306
Simulation of Flexible Fibres <i>J R Melrose, Z Ning and J Jones</i>	325
Cells and Molecules in the Properties of Hair and Wool <i>G E Rogers</i>	335
The Cell Biology of Skin and Hair <i>T Kealey</i>	364
The Cornified Cell Envelope: An Important Marker of Stratum Corneum Maturation in Healthy and Dry Skin <i>C R Harding, A V Rawlings, S Long, J Richardson, J Rogers, Z Zhang and A Bush</i>	389
Tetrameric Serine Hydroxymethyltransferase: Insights into Molecular Organisation, Function and Rational Drug Design <i>N A Rao, R Talwar, J R Jagath and H S Savithri</i>	407
Functional Properties of Exocellular Polysaccharides in Dairy Based Foods <i>R Vreeker, M T Pliejsier and A M Ledeboer</i>	425
Phase Separation in Mixed Carrageenan Systems <i>L Lundin, K Odic, T J Foster and I T Norton</i>	436
In Praise of the Hydrogen Bond <i>T Ramasarma</i>	450
A Surface Chemical Analog of the Tear Film Breakup on the Cornea <i>A Sharma and G Reiter</i>	463
Molecular Analysis of Wheat Gluten Fractions by Light Scattering and Transmission Electron Microscopy <i>G Sreeramulu, E L Sliwinski, J M Vereijken and P Kolster</i>	480
