

Contents

Preface	v
Acknowledgements	vii
Chapter 1 Introduction	1
1.1 Note on Transliteration	2
Chapter 2 Instrumental Earthquake Location	3
2.1 General Principles	3
2.2 Agencies and Methods	4
2.2.1 International Recording and Analysis	4
2.2.2 Local and Regional Agencies	6
2.2.3 Special Studies and Relocations	6
2.2.4 Our Relocations	7
2.3 Location in Different Time Periods	8
2.3.1 Up to 1920	8
2.3.2 From 1920 to 1950	10
2.3.3 From 1950 to 1963	10
2.3.4 From 1964 to 1995	11
Chapter 3 Determination of Earthquake Size	13
3.1 General Principles	13
3.2 Surface-Wave Magnitude (M_S)	13
3.2.1 Prague Formula for Surface-Wave Magnitude	14
3.2.2 Station Corrections for Magnitude	16
3.2.3 Distance Correction for the Original Prague Formula	17
3.2.4 Averaging Station Magnitudes to Give Event Magnitude M_S	18
3.2.5 Errors in M_S Determinations	20
3.3 Body-Wave Magnitude (m_b)	20
3.4 Seismic Moment (M_O)	21

3.5	Other Measures of Earthquake Size	21
3.6	Existing Magnitude Estimates for Our Study Area	21
3.7	Our Redeterminations	23
3.7.1	Choice of Magnitude Scale	23
3.7.2	Basic Amplitude and Period Data	24
3.7.3	Focal Depth	24
3.7.4	Variation with Time	24
3.7.5	Practical Difficulties	26
3.7.6	Summary	27
Chapter 4	Macroseismic Information and Location	29
Chapter 5	Description of Seismicity	31
Chapter 6	Conclusions	43
Appendix A	Case Histories of Earthquakes	45
A.1	Explanation	45
A.2	Individual Case Histories	46
Appendix B	Parametric Catalogue of Earthquakes	223
B.1	Notes on Parametric Table	223
B.1.1	Origin	223
B.1.2	Agency	224
B.1.3	Size	224
B.1.4	Other Information	225
B.2	Parametric Table	225
