

Contents

Preface.....	ix
Chapter 1 Introduction.....	1
1.1 Systems approach to problem solving	3
1.2 Systems approach to communication.....	6
1.3 The P/p methodology.....	12
1.4 This book.....	13
1.5 Summary	14
1.6 Exercises	14
Chapter 2 Key concepts.....	17
2.1 Definitions.....	17
2.2 Entity and referent	19
2.3 Referents and their representations	20
2.4 Referents and their environment	23
2.5 System.....	25
2.6 Black box system.....	31
2.7 Structural system	35
2.8 Product	36
2.9 Process.....	38
2.10 P/p graph	40
2.11 Summary	41
2.12 Exercises	42
Chapter 3 Modelling.....	45
3.1 Representation	45
3.2 Means of communication	47
3.3 Models.....	52
3.4 The modelling process.....	54
3.5 Summary	55
3.6 Exercises	55
Chapter 4 Systems	57
4.1 Investigating the notion of 'system'	58

4.2	System – formal definition	59
4.3	Black box systems	64
4.4	Structural systems	64
4.5	Specification, validation and verification	69
4.6	Constructivity	71
4.7	Summary	72
4.8	Exercises	73
Chapter 5 Measures		75
5.1	Symbol sets, symbol systems and types	76
5.2	Measurement, scale types, scales, scaling transformations	79
5.3	Obtaining measurement values	92
5.4	General obligations of the measurer	97
5.5	Measurement in practice	98
5.6	Summary	100
5.7	Exercises	101
Chapter 6 Black box systems		107
6.1	Modelling the characteristics of the referent	108
6.2	The attribute set of the black box system	114
6.3	The relationship set of the black box system	115
6.4	Modelling classes of referents	117
6.5	Black box systems and measurement hierarchy	117
6.6	Summary	119
6.7	Exercises	120
Chapter 7 Structural systems		123
7.1	Uses and representations of system structure	124
7.2	Bipartite graph in construction, system integration, analysis	126
7.3	The bipartite graph in design	130
7.4	Summary	135
7.5	Exercises	136
Chapter 8 Products		139
8.1	Product as system	139
8.2	Product as black box	140
8.3	Product as structure	142
8.4	Classification of products	143
8.5	Representation of product classes	149

8.6	Summary	149
8.7	Exercises	150
Chapter 9	Processes.....	153
9.1	Process as system.....	153
9.2	Process as black box	154
9.3	Process as structure.....	160
9.4	Classification of processes	168
9.5	Summary	171
9.6	Exercises	172
Chapter 10	Product/process systems.....	175
10.1	The case of the missed interview – a student exercise	175
10.2	Modelling text messaging.....	192
10.3	A new parliamentary procedure	197
10.4	Continuous process improvement at NTC’s Product Directorate G.....	203
10.5	Quality management.....	210
Index	211
