FOREWORD .....	VII
ACKNOWLEDGEMENTS .....	XIX
1. INTRODUCTION.....	3
<b>1.1. Batch Processes.....</b>	<b>3</b>
<b>1.2. Distillation.....</b>	<b>4</b>
<b>1.3. Continuous Distillation .....</b>	<b>4</b>
<b>1.4. Batch Distillation.....</b>	<b>5</b>
<b>1.5. Semi-batch (semi-continuous) Distillation.....</b>	<b>7</b>
<b>1.6. Advantages of Batch Distillation .....</b>	<b>7</b>
<b>References.....</b>	<b>10</b>
2. COLUMN CONFIGURATIONS .....	11
<b>2.1. Conventional Column Configuration .....</b>	<b>11</b>
<b>2.2. Unconventional Column Configurations .....</b>	<b>11</b>
2.2.1. Inverted Batch Distillation Column.....	11
2.2.2. Middle Vessel Batch Distillation Column.....	12
2.2.3. Multivessel Batch Distillation Column .....	13
2.2.4. Continuous Column for Batch Distillation.....	14
<b>References.....</b>	<b>16</b>
3. OPERATION .....	17

<b>3.1. Representation of Operational Alternatives Using State Task Network</b>	<b>17</b>
3.1.1. Binary Mixtures.....	18
3.1.2. Multicomponent Mixtures.....	20
<b>3.2. Column Operation</b>	<b>22</b>
3.2.1. Constant Vapour Boilup Rate.....	22
3.2.2. Constant Condenser Vapour Load.....	23
3.2.3. Constant Distillate Rate.....	25
3.2.4. Constant Reboiler Duty.....	25
3.2.5. Cyclic Operation.....	25
<b>3.3. Start-up, Production and Shutdown</b>	<b>25</b>
3.3.1. Start-up Period.....	26
3.3.2. Product Period.....	26
3.3.3. Shutdown Period.....	27
3.3.4. Case Study.....	28
<b>3.4. Performance Measure</b>	<b>33</b>
3.4.1. Case Study- Experiment Based Algorithm for Minimum Time.....	34
<b>3.5. Column Holdup</b>	<b>37</b>
3.5.1. Column Characterisation- the Degree of Difficulty of Separation...	38
3.5.2. Performance Measure - Minimum Time.....	39
3.5.3. Case Study.....	39
<b>3.6. Campaign Operation</b>	<b>49</b>
<b>3.7. Recycle Operation</b>	<b>51</b>
3.7.1. Binary Mixture.....	51
3.7.2. Multicomponent Mixture.....	52
<b>References</b>	<b>54</b>
<b>4. MODELLING AND SIMULATION</b>	<b>56</b>
<b>4.1. Introduction</b>	<b>56</b>
4.1.1. Simulation of Start-up Period.....	56
4.1.2. Simulation of Product Period.....	57

<b>4.2. Models for Conventional Batch Distillation .....</b>	<b>58</b>
4.2.1. Rayleigh Model - Model Type I.....	58
4.2.2. Short-cut Model- Model Type II.....	59
4.2.3. Simple Model- Model Type III.....	63
4.2.4. Rigorous Model - Model Type IV.....	68
4.2.5. Rigorous Model with Chemical Reactions – Model Type V.....	79
<b>4.3. Models for Unconventional Batch Distillation .....</b>	<b>85</b>
4.3.1. Continuous Column for Batch Distillation.....	85
4.3.2. Inverted Batch Distillation (IBD) Column.....	88
4.3.3. Middle Vessel Batch Distillation Column (MVC).....	96
4.3.4. Multivessel Batch Distillation Column (MultiBD).....	103
<b>4.4. Packed Batch Distillation and Model .....</b>	<b>106</b>
<b>4.5. Numerical Issues .....</b>	<b>107</b>
4.5.1. Classification of ODEs and DAEs .....	107
4.5.2. Integration Methods.....	108
4.5.3. Initialisation of the DAE System.....	111
<b>Nomenclature .....</b>	<b>111</b>
<b>References.....</b>	<b>112</b>
<b>5. DYNAMIC OPTIMISATION.....</b>	<b>116</b>
<b>5.1. Optimisation.....</b>	<b>116</b>
5.1.1. Essential Features of Optimisation Problems.....	116
<b>5.2. Dynamic Optimisation (Optimal Control) of Batch Distillation .....</b>	<b>117</b>
5.2.1. Minimum Time Problem.....	119
5.2.2. Maximum Distillate Problem.....	120
5.2.3. Maximum Profit/Productivity Problem.....	121
<b>5.3. Summary of the Past Work on Dynamic Optimisation.....</b>	<b>122</b>
<b>5.4. Summary of the Past Work on the Solution of Optimisation Problems .....</b>	<b>124</b>
<b>5.5. Maximum Principle Based Dynamic Optimisation Technique .....</b>	<b>124</b>

5.5.1. Application to Batch Distillation: Minimum Time Problem .....	126
5.5.2. Application to Batch Distillation: Maximum Distillate Problem...	132
5.5.3. Application to Batch Distillation: Maximum Profit Problem .....	133
5.5.4. Application to Batch Distillation: Short-cut Model .....	134
<b>5.6. Approaches to Nonlinear Dynamic Optimisation Technique.....</b>	<b>135</b>
5.6.1. Feasible Path Approach.....	135
5.6.2. Infeasible Path Approach.....	135
<b>5.7. Nonlinear Programming (NLP) Based Dynamic Optimisation Problem- Feasible Path Approach .....</b>	<b>136</b>
5.7.1. Control Vector Parameterisation (CVP).....	137
5.7.2. NLP Optimisation Problem .....	138
<b>5.8. NLP Based Dynamic Optimisation Problem- Infeasible Path Approach .....</b>	<b>139</b>
<b>5.9. Gradient Evaluation Methods in NLP Based Optimisation Techniques .....</b>	<b>140</b>
5.9.1. Gradient Evaluation for Infeasible Path Approach .....	140
5.9.2. Gradient Evaluation for Feasible Path Approach.....	140
<b>5.10. Application of NLP Based Techniques in Batch Distillation .....</b>	<b>144</b>
5.10.1. Example 1 .....	144
5.10.2. Example 2 .....	145
5.10.3. Example 3 .....	147
<b>References.....</b>	<b>150</b>
<b>6. MULTIPERIOD OPERATION OPTIMISATION .....</b>	<b>153</b>
<b>6.1. Introduction .....</b>	<b>153</b>
<b>6.2. Optimisation Problem Formulation- Mujtaba and Macchietto.....</b>	<b>155</b>
6.2.1. Binary Operation .....	156
6.2.2. Multicomponent Operation .....	160
<b>6.3. Solution Method – Mujtaba and Macchietto.....</b>	<b>164</b>
6.3.1. Column Initialisation .....	164

6.3.2. Inner Loop Optimisation Problems .....	164
6.3.3. Outer Loop Optimisation Problem .....	165
<b>6.4. Example Problems .....</b>	<b>168</b>
6.4.1. Binary Distillation (Simple Model).....	168
6.4.2. Ternary Distillation (Simple Model).....	170
6.4.3. Ternary Distillation (Detailed Model).....	176
6.4.4. Multiperiod Campaign Operation Optimisation - Industrial Case Study .....	179
<b>6.5. Optimisation Problem Formulation- Farhat et al. ....</b>	<b>187</b>
6.5.1. Problem 1 - Maximisation of Main-cuts .....	187
6.5.2. Problem 2 - Minimisation of Off-cuts .....	188
6.5.3. Example.....	189
<b>References .....</b>	<b>191</b>
<b>7. DESIGN AND OPERATION OPTIMISATION.....</b>	<b>192</b>
<b>7.1. Introduction .....</b>	<b>192</b>
<b>7.2. Design and Operation Optimisation for Single Separation Duty by Repetitive Simulation .....</b>	<b>193</b>
7.2.1. Example - Single Separation Duty .....	199
<b>7.3. Design and Operation Optimisation for Single and Multiple Separation Duties: Problem Formulation and Solution .....</b>	<b>199</b>
7.3.1. Representation of Design, Operations and Separations Duties .....	200
7.3.2. Objective Function .....	204
7.3.3. Optimisation Problem Formulation and Solution .....	205
7.3.4. Examples .....	212
<b>7.4. Multiperiod Design and Operation Optimisation by Logsdon et al. .</b>	<b>219</b>
7.4.1. Example 1 .....	220
7.4.2. Example 2.....	220
7.4.3. Combination of Allocation Time with Zero Set up Time .....	222
<b>7.5. Multiperiod Operation Optimisation by Bonny et al. ....</b>	<b>224</b>
7.5.1. Example.....	227

<b>References.....</b>	<b>229</b>
<b>8. OFF-CUT RECYCLE .....</b>	<b>230</b>
<b>8.1. Introduction - Off-cut Recycle in Binary Separation.....</b>	<b>230</b>
<b>8.2. Classical Two-Level Optimisation Problem Formulation for Binary Mixtures .....</b>	<b>233</b>
8.2.1. Example Problems - Set 1 .....	236
8.2.2. Example Problems - Set 2 .....	241
<b>8.3. One Level Optimisation Problem Formulation for Binary Mixtures</b>	<b>242</b>
<b>8.4. Comparison of the Two Level and the One Level Formulations .....</b>	<b>243</b>
<b>8.5. More Examples using the One Level Optimisation Formulation.....</b>	<b>244</b>
<b>8.6. Notes on Binary Off-cut Recycle .....</b>	<b>246</b>
<b>8.7. Introduction - Off-cut Recycle in Multicomponent Separation.....</b>	<b>247</b>
8.7.1. Operational Strategies for Off-cut Recycle .....	249
<b>8.8. Optimisation Problem Formulation for Multicomponent Mixtures .</b>	<b>250</b>
8.8.1. Solution of the Optimisation Problem.....	252
<b>8.9. Decomposition of the Optimisation Problem Formulation for Multicomponent Mixtures.....</b>	<b>253</b>
<b>8.10. Measure of "the degree of difficulty" of Separation, <math>q</math> for Multicomponent Mixtures.....</b>	<b>256</b>
<b>8.11. Example Problems using Multicomponent Mixtures .....</b>	<b>257</b>
8.11.1. Example 1 .....	257
8.11.2. Example 2 .....	262
<b>8.12. Multicomponent Off-cut Recycle Policy of Bonny et al. ....</b>	<b>263</b>
8.12.1. Example .....	265
<b>References.....</b>	<b>269</b>

<b>9. BATCH REACTIVE DISTILLATION (BREAD)</b> .....	<b>270</b>
<b>9.1. Introduction</b> .....	<b>270</b>
<b>9.2. Review</b> .....	<b>271</b>
9.2.1. Experimental Studies.....	271
9.2.2. Modelling and Simulation .....	272
9.2.3. Design, Control and Optimisation.....	272
<b>9.3. Selecting the Right Column for BREAD</b> .....	<b>273</b>
<b>9.4. Process Modelling and Simulation</b> .....	<b>274</b>
<b>9.5. Dynamic Optimisation</b> .....	<b>276</b>
<b>9.6. Example: Dynamic Optimisation</b> .....	<b>277</b>
<b>9.7. Profit Maximisation via Maximum Conversion Optimisation</b> .....	<b>282</b>
9.7.1. Example .....	283
<b>9.8. Polynomial Based Optimisation Framework - A New Approach</b> .....	<b>285</b>
<b>9.9. Campaign Mode Operation Optimisation</b> .....	<b>289</b>
9.9.1. Example: Hydrolysis of Acetic Anhydride .....	290
<b>9.10. Optimal Design of Operating Procedures with Parametric Uncertainty</b> .....	<b>293</b>
9.10.1. The Worst-case Design Algorithm.....	293
9.10.2. Case Study .....	294
<b>References</b> .....	<b>300</b>
<b>10. BATCH EXTRACTIVE DISTILLATION (BED)</b> .....	<b>302</b>
<b>10.1. Introduction</b> .....	<b>302</b>
<b>10.2. Comparison Between a CBD and a BED Process</b> .....	<b>304</b>
<b>10.3. Solvent Feeding Modes and Operating Constraints</b> .....	<b>304</b>

10.3.1. Batch Mode .....	304
10.3.2. Semi-continuous Mode.....	307
<b>10.4. Operational Constraint (Path Constraint).....</b>	<b>309</b>
10.4.1. One Time Interval .....	309
10.4.2. Two Time Intervals .....	309
<b>10.5. General Multiperiod Dynamic Optimisation (MDO) Problem Formulation .....</b>	<b>311</b>
<b>10.6. Product Specifications and Decomposition of MDO Problem into Single-period Dynamic Optimisation (SDO) Problems .....</b>	<b>313</b>
10.6.1. Maximum Productivity Problem .....	314
10.6.2. Minimum Time Problem .....	315
<b>10.7. Process Model and the Solution Method .....</b>	<b>316</b>
<b>10.8. Case Studies .....</b>	<b>317</b>
10.8.1. Example 1: Minimum Time Problem - Close Boiling Mixture.....	317
10.8.2. Example 2: Maximum Productivity Problem - Close Boiling Mixture.....	324
10.8.3. Example 3: Multiperiod Optimisation with Azeotropic Mixture .....	326
<b>References.....</b>	<b>329</b>
<b>11. UNCONVENTIONAL BATCH DISTILLATION.....</b>	<b>331</b>
<b>11.1. Introduction.....</b>	<b>331</b>
<b>11.2. Use of Continuous Columns for Batch Distillation .....</b>	<b>331</b>
11.2.1. Introduction .....	331
11.2.2. SPSS, SPSSS, MPSSS Operations .....	334
11.2.3. Single Separation Duty in Continuous Columns .....	336
11.2.4. Case Study – Single Separation Duty.....	339
11.2.5. Multiple Separation Duties in Continuous Columns .....	346
11.2.6. Case Study – Multiple Separation Duties.....	347
11.2.7. Notes on the Use of Continuous Columns for Batch Distillation .....	350

<b>11.3. Middle Vessel Batch Distillation Column (MVC).....</b>	<b>351</b>
<b>11.4. Inverted Batch Distillation (IBD) Column .....</b>	<b>353</b>
11.4.1. Example 1.....	353
11.4.2. Example 2.....	354
<b>11.5. Multi Vessel Batch Distillation Column (MultiBD) .....</b>	<b>355</b>
11.5.1. Optimisation Problem Formulation.....	355
11.5.2. Example.....	359
<b>References.....</b>	<b>363</b>
<b>12. APPLICATION OF NEURAL NETWORKS IN BATCH DISTILLATION</b>	<b>365</b>
<b>12.1. Introduction.....</b>	<b>365</b>
12.1.1. Neural Networks Architecture.....	366
12.1.2. Neural Networks Training.....	367
<b>12.2. Hybrid Modelling and Optimisation in CBD.....</b>	<b>367</b>
12.2.1. The Model and the Actual Process.....	368
12.2.2. Hybrid Modelling of Dynamic Processes .....	369
12.2.3. Dynamic Optimisation Framework Using First Principle Model	371
12.2.4. Dynamic Optimisation Framework Using Hybrid Model .....	371
12.2.5. Hybrid Model Development for Pilot Batch Distillation Column	373
12.2.6. NN Based Optimisation Algorithm.....	377
<b>12.3. NN Based Modelling and Optimisation in MVC .....</b>	<b>379</b>
12.3.1. Neural Network Based Modelling.....	379
12.3.2. Optimisation Problem Formulation.....	385
12.3.3. Results and Discussions.....	386
