1. Introduction	1
Past and Present	1
References	5
2. The Intraspinal Plexus Injury and Its Natural History	7
Conclusion	16
References	17
3. Surgical Anatomy	19
The Brachial Plexus	19
The Lumbosacral Plexus and Cauda Equina	21
The Root Sheath	23
Blood Supply	25
The Cervical Nerve Roots	27
The Cervical Spinal Cord	29
Conclusion	35
References	35
4. Assessment of Patients with Intraspinal Plexus Injuries	38
Clinical Examination	38
Ancillary Investigations	47
References	61

5. Palliative Peripheral Nerve Procedures for Spinal Root Injuries	63
Intraplexus Transfers	64
Extraplexus Transfers	64
Intercostal Nerve Transfers	65
Spinal Accessory Nerve Transfers	67
Other Nerves	67
Outcome of Nerve Transfers	68
End-to-Side or Termino-Lateral Repair	70
Lumbosacral Plexus Lesions	71
Conclusion	74
References	75
6. Basic Science of Experimental Root Injuries	78
The Transitional Region (TR)	78
Degeneration and Regeneration	83
Regenerated Function	101
Conclusion	107
References	107
7. Surgical Exposures and Repairs	112
Exposures	113
Repairs	131
Conclusion	137
References	137
8. Outcome	139
Brachial Plexus	139
Lumbosacral Plexus	160
Conclusion	162
References	163
9. Conclusion	167
The Future	167
References	175
