

# Contents

Preface	v
<b>Bayes/Frequentist</b>	<b>1</b>
Frequentist and Bayesian Statistics: A Critique (Keynote Address) <i>D. R. Cox*</i>	3
Generalized Frequentist Methods for Calculating $p$ -Values and Confidence Intervals <i>L. Demortier</i>	7
Bayesian Reference Analysis <i>L. Demortier</i>	11
Cosmological Bayesian Model Selection <i>R. Trotta</i>	15
Towards Reconciliation Between Bayesian and Frequentist Reasoning <i>T. Podobnik and T. Živko†</i>	19
<b>Goodness of Fit</b>	<b>23</b>
Goodness of Fit — With a View Towards Particle Physics <i>S. L. Lauritzen*</i>	25
Goodness-of-Fit for Sparse Distributions in High Energy Physics <i>B. Yabsley</i>	31
Likelihood Analysis and Goodness-of-Fit in Low Counting Rate Experiments <i>A. Ianni</i>	35
The “Sieve” Algorithm — Sifting Data in the Real World <i>M. M. Block</i>	39
$\chi^2$ Test for the Comparison of Weighted and Unweighted Histograms <i>N. D. Gagunashvili</i>	43

---

\*Invited Speaker

†Speaker

<b>Likelihood/Parameter Estimation</b>	<b>45</b>
Reduction of the Number of Variables in Parameter Inference <i>G. Zech</i>	47
Errors from the Likelihood Function <i>R. J. Barlow</i>	51
Asymmetric Statistical Errors <i>R. J. Barlow</i>	56
Bias-Free Estimation in Multicomponent Maximum Likelihood Fits with Component-Dependent Templates <i>P. Catastini<sup>†</sup> and G. Punzi</i>	60
Least Squares Approach to the Alignment of the Generic High Precision Tracking System <i>P. Brückman de Renstrom<sup>†</sup> and S. Haywood</i>	64
A New Fast Track-Fit Algorithm Based on Broken Lines <i>V. Blobel</i>	68
<b>Nuisance Parameters/Limits/Discovery</b>	<b>73</b>
Treatment of Nuisance Parameters in High Energy Physics, and Possible Justifications and Improvements in the Statistics Literature <i>R. D. Cousins*</i>	75
Response (To Cousins) <i>N. Reid</i>	86
Ordering Algorithms and Confidence Intervals in the Presence of Nuisance Parameters <i>G. Punzi</i>	88
Likelihood Ratio Intervals with Bayesian Treatment of Uncertainties: Coverage, Power and Combined Experiments <i>J. Conrad and F. Tegenfeldt<sup>†</sup></i>	93
Limits and Confidence Intervals in the Presence of Nuisance Parameters <i>W. A. Rolke<sup>†</sup>, A. M. López and J. Conrad</i>	97
The Bayesian Approach to Setting Limits: What to Avoid <i>J. Heinrich</i>	98
Statistically Dual Distributions in Statistical Inference <i>S. I. Bityukov<sup>†</sup>, V. V. Smirnova, N. V. Krasnikov and V. A. Taperechkina</i>	102
Program for Evaluation of Significance, Confidence Intervals and Limits by Direct Calculation of Probabilities <i>S. I. Bityukov<sup>†</sup>, S. E. Erofeeva, N. V. Krasnikov and A. N. Nikitenko</i>	106

Examining the Balance Between Optimising an Analysis for Best Limit Setting and Best Discovery Potential	108
<i>G. C. Hill<sup>†</sup>, J. Hodges, B. Hughey, A. Karle and M. Stamatikos</i>	
Statistical Challenges for Searches for New Physics at the LHC	112
<i>K. Cranmer*</i>	
<b>Machine Learning</b>	<b>125</b>
Separating Signal from Background Using Ensembles of Rules	127
<i>J. H. Friedman*</i>	
Comment on “Separating Signal from Background Using Ensembles of Rules”	137
<i>H. B. Prosper</i>	
Boosted Decision Trees, A Powerful Event Classifier	139
<i>B. P. Roe<sup>†</sup>, H.-J. Yang and J. Zhu</i>	
Optimization of Signal Significance by Bagging Decision Trees	143
<i>I. Narsky (delivered by H. B. Prosper)</i>	
Nonparametric Bayesian Classification with Massive Datasets: Large-Scale Quasar Discovery	147
<i>A. Gray<sup>†</sup>, G. Richards, R. Nichol, R. Brunner and A. Moore</i>	
Bayesian Neural Networks	151
<i>P. C. Bhat<sup>†</sup> and H. B. Prosper</i>	
Signal Enhancement Using Multivariate Classification Techniques and Physical Constraints	155
<i>R. Vilalta<sup>†</sup>, P. Sarda, G. Mutchler, B. P. Padley and S. Taylor</i>	
<b>Software</b>	<b>159</b>
Software for Statistics for Physics	161
<i>J. T. Linnemann*</i>	
Statistical Computations with Astrogrid and the Grid	167
<i>R. Nichol*, G. Smith, C. Miller, C. Genovese, L. Wasserman, B. Bryan, A. Gray, J. Schneider and A. Moore</i>	
gPlot: A Quick Introduction	173
<i>M. Pivk (delivered by F. Le Diberder)</i>	
Easy Data Analysis Using R	178
<i>M. Paterno</i>	

Statistics in Root <i>R. Brun, A. Kreshuk<sup>†</sup> and L. Moneta</i>	182
The RooFit Toolkit for Data Modeling <i>W. Verkerke<sup>†</sup> and D. Kirkby</i>	186
An Update on the Goodness-of-Fit Statistical Toolkit <i>B. Mascialino, M. G. Pia<sup>†</sup>, A. Pfeiffer, A. Ribon and P. Viarengo</i>	190
CEDAR: Combined E-Science Data Analysis Resource <i>A. Buckley</i>	193
<b>Visualisation</b>	<b>195</b>
Visualising Data <i>S. Holmes*</i>	197
<b>Astrophysics</b>	<b>209</b>
Astrophysics with Terabytes of Data <i>A. S. Szalay*</i>	211
Multiscale Geometric Analysis of the 2DF Data <i>J.-L. Starck*, V. J. Martínez and E. Saar</i>	219
Application of a Multidimensional Wavelet Denoising Algorithm for the Detection and Characterization of Astrophysical Sources of Gamma Rays <i>S. W. Digel<sup>†</sup>, B. Zhang, J. Chiang, J. M. Fadili and J.-L. Starck</i>	229
Higher Criticism Statistic: Theory and Applications in Non-Gaussian Detection <i>J. Jin</i>	233
Expected Principal Component Analysis of Cosmic Microwave Background Anisotropies <i>S. Leach</i>	237
<b>Time Series</b>	<b>241</b>
On-Line Inference for Data Streams <i>P. Clifford*</i>	243
<b>Deconvolution</b>	<b>253</b>
Some Aspects of Statistical Image Modelling and Restoration <i>D. M. Titterton*</i>	255
Iterative Inversion Methods for Statistical Inverse Problems <i>N. Bissantz</i>	263

Unfolding with System Identification <i>N. D. Gagunashvili</i>	267
<b>Summaries</b>	<b>271</b>
Statistics in Astrophysics and Cosmology: Phystat05 <i>A. H. Jaffe*</i>	273
Summary of Some Statistical Issues <i>N. Reid*</i>	279
Concluding Talk: Physics <i>G. J. Feldman*</i>	283
<b>Appendices</b>	<b>289</b>
Questions for Panel Discussion	291
Panel Discussion	294
Committees	308
List of Participants	309
