

CONTENTS

Preface	v
----------------	----------

FUNDAMENTALS

Chapter 1	Introduction	
1.1.	Introduction	1
1.2.	Definition and Significance	2
1.3.	Classification of Biophotonics in Dentistry	3
1.3.1.	Diagnostic	3
1.3.2.	Therapeutic	4
1.3.3.	Research	5
1.4.	Future Opportunities	7
1.5.	Scope of this Book	8
Chapter 2	Photomechanics	
2.1.	Introduction to Mechanics	9
2.1.1.	Force and Stress	10
2.1.2.	Deformation and Strain	13
2.1.3.	Stress-Strain Equations	16
2.2.	Basic Optical Engineering	16
2.2.1.	Geometric Optics	17
2.2.2.	Physical (Wave) Optics	19
2.2.3.	Photonics	27
2.3.	Photomechanics	30
2.3.1.	Moiré and Grid Methods	31
2.3.2.	Speckle Methods	40
2.3.3.	Photoelasticity	46
2.3.4.	Holography	54
2.3.5.	Digital Photomechanics	58
2.4.	Concluding Remarks	60

Chapter 3	Biomedical Imaging	
3.1.	Introduction	64
3.2.	Non-Linear Optical Microscopy (NLOM): Multiphoton Excited Fluorescence (MPEF) and Second Harmonic Generation (SGH)	65
3.2.1.	Principles of NLOM	66
3.2.2.	Development and Applications of NLOM	69
3.2.3.	NLOM in Dentistry	72
3.3.	Optical Coherence Tomography (OCT)	73
3.3.1.	Principles of OCT	74
3.3.2.	Developments and Applications of OCT	75
3.3.3.	OCT in Dentistry	80
3.4.	Coherent Anti-Stokes Raman Scattering (CARS) and Modulated Imaging (MI)	82
3.5.	Fluorescence Contrast Enhancement	85
3.6.	Concluding Remarks	87
Chapter 4	Spectroscopy	
4.1.	Introduction	93
4.2.	Molecular Orbitals and Transitions	94
4.3.	Transition Dipole Moment	99
4.4.	Spin Selection Rule	100
4.5.	Franck-Condon Principle	102
4.6.	Jablonski Diagram	104
4.7.	Stokes Shift	107
4.8.	Spectrophotometry	108
4.9.	Fluorescence Intensity and Lifetime	110
4.10.	Spectrofluorimetry	112
4.11.	Fluorescence Quenching	115
4.12.	Fluorescence Resonance Energy Transfer (FRET)	116
4.13.	Fourier Transform Infrared (FTIR) Spectroscopy	117
4.14.	Concluding Remarks	120

Chapter 5	Lasers and Laser Tissue Interaction	
5.1.	Introduction	123
5.2.	Laser Basics	124
	5.2.1. Characteristics of Lasers	126
5.3.	Light Propagation in Tissue	128
5.4.	Optical Imaging and Diagnosis	131
	5.4.1. Optical Imaging	131
	5.4.2. Optical Spectroscopic Diagnosis	133
5.5.	Optical Processing of Tissue	141
	5.5.1. Photothermal Effects	142
	5.5.2. Photomechanical Effects	144
	5.5.3. Photochemical Effects	144
	5.5.4. Applications of Laser Processing of Tissue	145
5.6.	Concluding Remarks	148
Chapter 6	Mechanisms and Applications of Photodynamic Therapy	
6.1.	Historical Background	154
6.2.	Photosensitizers	155
6.3.	Light Applicators	156
6.4.	PDT Mechanisms	161
	6.4.1. Photophysics and Photochemistry	161
	6.4.2. Biological Effect	162
6.5.	PDT Dosimetry	166
6.6.	Progress in Clinical Application	167
	6.6.1. Non-Malignant Diseases	168
	6.6.2. Malignant Diseases	169
6.7.	PDT in Dentistry	175
	6.7.1. Technical Challenges	175
	6.7.2. Current Status	176
6.8.	Concluding Remarks	177

APPLICATIONS

Chapter 7	Dental Photo-Biomechanics	
	7.1. Introduction	183
	7.2. Photoelasticity	184
	7.2.1. Introduction	184
	7.2.2. Photoelastic Models	185
	7.2.3. Polariscope	186
	7.2.4. Photoelastic Fringe Analysis	189
	7.2.5. Applications of Photoelasticity in Dentistry	192
	7.3. Moiré Interferometry	195
	7.3.1. Introduction	195
	7.3.2. Specimen Grating and Moiré Interferometer	196
	7.3.3. Applications of Moiré Technique in Dentistry	197
	7.4. Electronic Speckle Pattern Correlation Interferometry	200
	7.4.1. Introduction	200
	7.4.2. ESPI Experimental Arrangement	201
	7.4.3. Applications of ESPI Technique in Dentistry	201
	7.5. Concluding Remarks	207
 Chapter 8	 Micro-Raman Spectroscopy: Principles and Applications in Dental Research	
	8.1. Introduction	209
	8.2. Breakdown of Composite Repair/Replacement Materials	210
	8.3. Material/Tissue Interface	211
	8.4. Brief Introduction to Raman Spectroscopy	212
	8.5. Applications of Micro-Raman Spectroscopy in Dental Research	215
	8.5.1. Characterization of the Smear Layer	215
	8.5.2. Characterization of Smear Debris	224

8.5.3.	Quantifying Reactions at the Adhesive/Dentin Interface	226
8.5.4.	Investigation of Adhesive Phase Separation	231
8.6.	Concluding Remarks	239
Chapter 9	Dental and Oral Tissue Optics	
9.1.	Introduction	245
9.2.	Continuous Wave Light Interaction with Tissues	248
9.3.	Time-Resolved Diffusion Measurements	253
9.4.	Optical Properties of Dental Enamel and Dentin	256
9.4.1.	Structure of Enamel and Dentin	256
9.4.2.	Spectral Properties of Enamel and Dentin	259
9.4.3.	Scattering Properties of Enamel	261
9.4.4.	Scattering Properties of Dentin	263
9.4.5.	Waveguide Effects	264
9.5.	Propagation of Polarized Light in Tissues	266
9.5.1.	Basic Principles	266
9.5.2.	Transillumination Polarization Technique	268
9.5.3.	Backscattering Polarization Imaging	269
9.5.4.	In-Depth Polarization Spectroscopy	272
9.5.5.	Superficial Epithelial Layer Polarization Spectroscopy	273
9.5.6.	Polarization Microscopy	274
9.5.7.	Digital Photoelasticity Measurements	274
9.6.	Optothermal Radiometry	275
9.7.	Thermal Imaging	279
9.8.	Coherent Effects in the Interaction of Laser Radiation with Tissues and Cell Flows	280
9.9.	Dynamic Light Scattering	283
9.9.1.	Quasi-Elastic Light Scattering	283
9.9.2.	Dynamic Speckles	284
9.9.3.	Full-Field Speckle Technique- LASCA	285
9.9.4.	Diffusion Wave Spectroscopy	286
9.9.5.	Experimental Studies	287

9.10.	Coherent Backscattering	287
9.11.	Optical Coherence Tomography (OCT)	288
9.11.1.	Introduction	288
9.11.2.	Conventional (Time-Domain) OCT	289
9.11.3.	En-Face OCT	290
9.11.4.	Doppler OCT	291
9.11.5.	Polarization Sensitive OCT	292
9.11.6.	Optical Coherence Microscopy	294
9.12.	Concluding Remarks	295
Chapter 10	Fiber Optic Diagnostic Sensors	
10.1.	Introduction	301
10.2.	Fiber Optics in Diagnosis	302
10.3.	Fiber Optic Diagnostic Sensors: Principles	304
10.4.	Direct Fiber Optic Sensors: Principles	304
10.4.1.	Direct Fiber Optic Physical Sensors	306
10.4.2.	Direct Fiber Optic Chemical Sensors	306
10.5.	Indirect Fiber Optic Sensors: Principles	309
10.5.1.	Indirect Fiber Optic Physical Sensors	310
10.5.2.	Indirect Fiber Optic Chemical Sensors	313
10.6.	Biosensors	316
10.7.	Applications of Fiber Optic Diagnostic Sensors in Dentistry	319
10.8.	Concluding Remarks	326
