

CONTENTS

Contributors **xiii**

Preface **xix**

I Components of Angiogenic Cascades

**Chapter 1. Semaphorins, Plexins and Neuropilins and
Their Role in Vasculogenesis and Angiogenesis** **1**

Gera Neufeld, Niva Shraga-Heled, Tali Lange and Ofra Kessler

1. Introduction and Historical Perspective	1
2. The Semaphorins	3
3. The Plexin Receptor Family	4
4. The Neuropilins	6
5. Vascular Endothelial Growth Factors and Their Receptors	8
6. Signal Transduction by Neuropilins	11
7. The Role of the Neuropilins in the Regulation of Vasculogenesis and Angiogenesis	14
8. Modulation of Angiogenesis by Semaphorins that Bind Directly to Plexins	17
Acknowledgments	17
References	17

Chapter 2. EPH Receptors and Ephrins 27

Elena B. Pasquale

1. Introduction	27
2. Effects on Vascular Cell Behavior and Signaling Pathways	32
3. Endothelial Cell Fate	42
4. Angiogenic Remodeling of Embryonic Blood Vessels	43
5. Lymphatic Vessels	49
6. Adult Vasculature	50
7. Targeting Eph Receptor-Ephrin Interactions to Modulate Angiogenesis	58
8. Perspectives	59
Acknowledgments	60
References	60

Chapter 3. The FGF Family of Angiogenic Growth Factors 67

Patrick Auguste and Andreas Bikfalvi

1. Introduction	67
2. Molecular Mechanisms	68
3. Role in Vascular Development	73
4. FGFs in Tumor Angiogenesis	75
5. Role of FGFs in Developmental and Tumor Lymphangiogenesis	78
6. Role in Repair-Associated Angiogenesis and Ischemia Revascularization	78
7. Conclusion	80
Acknowledgments	81
References	81

**Chapter 4. Neuropeptide Y: Neurogenic Mediator of
Angiogenesis and Arteriogenesis 91**

Joanna B. Kitlinska and Zofia Zukowska

1. The NPY System	91
2. NPY as a Growth Factor for Vascular Cells	93

3. DPPIV: A Molecular Switch of the NPY Angiogenic System	97
4. Downstream Mediators of NPY Actions	98
5. NPY in Revascularization of Ischemic Tissues	99
6. NPY in Wound Healing	101
7. NPY in Adipose Tissue Growth and Obesity	102
8. NPY in Retinopathy	103
9. NPY-Induced Angiogenesis in Angioplasty-Induced Neointima and Atherogenesis	105
10. NPY in Tumor Angiogenesis	105
11. NPY-Mediated Angiogenesis and Neurogenesis	109
References	111

Chapter 5. Modulation of Growth Factor Signaling by Heparan Sulfate Proteoglycans **119**

Nicholas W. Shworak

1. Introduction	119
2. Historical Perspective	121
3. The Structure, Synthesis, and Post-Synthetic Modification of HSPGs	123
4. Evolution of HSPGs	129
5. HSPGs in Development	131
6. HSPG Modulation of Ligand-Receptor Interactions	133
7. HSPGs Enable Global Control of EC Phenotype	139
8. Future Therapeutic Directions	139
9. Conclusions	140
References	141

II Angiogenic Regulators

Chapter 6. Directional Cues in Angiogenesis **147**

Arie Horowitz

1. Introduction: Blood Vessels and Nerves Use Similar Guidance Cues	147
2. Semaphorin Signaling	148

3. Ephrins and Eph Signaling	156
4. Netrin and Slit Signaling	163
5. Open Questions	165
References	166

**Chapter 7. Regulation of Angiogenesis and Arteriogenesis
by Hypoxia-Inducible Factor-1 175**

Gregg L. Semenza

1. Oxygen Homeostasis: Phylogeny, Ontogeny, Physiology, and Pathobiology	175
2. Hypoxia-Inducible Factor 1: Master Regulator of O ₂ Homeostasis	178
3. Control of Angiogenic Growth Factor and Cytokine Production by HIF-1	184
4. Cell-Autonomous Effects of HIF-1 in Vascular Endothelial Cells	185
5. Control of Angiogenesis and Arteriogenesis by HIF-1	186
6. Control of Tumor Angiogenesis by HIF-1	198
References	204

**Chapter 8. Redox State and Regulation of Angiogenic
Responses 217**

Masuko Ushio-Fukai and R. Wayne Alexander

1. Introduction	217
2. Reactive Oxygen Species (ROS) in the Vasculature	218
3. ROS and Angiogenesis	219
4. NAD(P)H Oxidase: A Major Source of ROS in the Vasculature	222
5. Role of NAD(P)H Oxidase in Angiogenesis	225
6. ROS as Signaling Molecules in Angiogenesis	229
7. Angiogenesis-Dependent Transcription Factors and Genes Regulated by ROS	233

8. Conclusion	235
References	235

Chapter 9. Angiogenesis and Arteriogenesis in Cardiac Hypertrophy **253**

Robert J. Tomanek and Eduard I. Dedkov

1. Introduction	253
2. Assessing Coronary Angiogenesis and Arteriogenesis	254
3. Pressure Overload-Induced Hypertrophy	254
4. Volume Overload-Induced Cardiac Hypertrophy	258
5. Thyroxine-Induced Hypertrophy	260
6. Hypoxia-Induced Hypertrophy	261
7. Exercise-Induced Hypertrophy	263
8. Myocardial Infarction-Induced Hypertrophy	264
9. Modulators of Angiogenesis During Hypertrophy	267
10. Stimuli of Angiogenesis During Hypertrophy	269
11. Summary	271
References	272

Chapter 10. Regulation of Coronary Vascular Tone and Microvascular Physiology **281**

Basel Ramlawi, Munir Boodhwani and Frank W. Sellke

1. Introduction	281
2. Coronary Resistance	283
3. Regulation of Coronary Microvascular Tone	285
4. Endothelial Factors in Vascular Growth and Response to Injury	300
5. Impact of Disease States on Coronary Circulation	301
6. The Coronary Microcirculation in Hypertrophic States	305
7. Summary	306
References	307

III Clinical Applications

Chapter 11. Kinase Inhibitors: Cancer Drugs Derived from Mechanistic Considerations 313

Karl-Heinz Thierauch and Andreas Chlistalla

1. Kinase Inhibition and Tumor Angiogenesis	313
2. Major Angiogenesis Factors and Receptors	314
3. Further Angiogenesis-Related Signaling	315
4. Need for Selectivity of Anti-Angiogenic Kinase Inhibitors	315
5. Kinase Inhibitors in Clinical Development	316
6. Challenges and Future Directions	332
Acknowledgments	335
References	335

Chapter 12. Therapeutic Angiogenesis — An Overview 343

Masahiro Murakami and Michael Simons

1. Introduction	343
2. Concepts and Rationales	344
3. Strategy	346
4. Clinical Trials	348
5. Issues Regarding Current Strategy	352
6. Emerging Concepts of Therapeutic Angiogenesis	358
7. Future Prospective	361
8. Summary	363
References	363

Chapter 13. Hepatocyte Growth Factor 367

Ryuichi Morishita and Toshio Ogihara

1. Hepatocyte Growth Factor in Cardiovascular System	367
2. HGF Signaling in Endothelial Cells	368
3. Angiogenic Therapy for Ischemic Peripheral Arterial Diseases	370
4. Clinical Trial in PAD	371
5. HGF Gene Therapy for Myocardial Ischemia	375

6. HGF Gene Therapy for Restenosis After Angioplasty	377
7. Next Five Years Perspective — Future Direction of HGF Therapy	378
Acknowledgments	379
References	380
Chapter 14. Role of Nitric Oxide in Adult Angiogenesis: Therapeutic Potential of Endothelial Nitric Oxide Synthase Gene Transfer	385
<i>Gabor M. Rubanyi</i>	
1. Endothelial Nitric Oxide in Health and Disease	385
2. Nitric Oxide and Angiogenesis	389
3. NOS Gene Transfer	393
4. Therapeutic Angiogenesis with NOS-III Gene Transfer for Critical Limb Ischemia	395
5. Potential Therapeutic Utility of NOS-III Gene Transfer in the Heart	407
6. Conclusions	410
Acknowledgments	411
References	411
Index	423
