Biography:

Bedwell was the daughter of Muriel Harrison, B.Sc. (Bedford,) of 23 Avondale Rd., Chesterfield. Her father was a medical practitioner who died before she entered Bedford College. In 1936, Bedwell began her studies with numerous scholarships which she kept over her years at the college. Her resident report card notes that she was a little over-conscientious and diffident, with a later remark "rather retiring socially, her work her chief interest". Bedwell's Ph.D. was in physical chemistry under Professor J. Spencer. In July 1941, she accepted a position as Experimental Officer with the Ministry of Supply, Swansea. However in September of the same year, she moved to a position in the Coal Utilisation Department of the University of Birmingham as this was nearer home. By 1947, she was working for the civil service.

Biography:

Cook, daughter of Maurice S Cook, Machinist, of 21 Bishopstone Rd. Gloucester entered Bedford College in 1930. She had problems remaining in university for her degrees, and applied to various places for jobs. In 1932 Cook applied to the Gilchrist and Gamble school intending to train as a research or analytical industrial chemist. However she remained at Bedford as they allowed her to work for her Ph.D. in organic chemistry under Professor E.E. Turner.

After graduation, Cook was an assistant to the research chemist, at the Shellac Bureau, London, later moving to a position under the High Commission for India, held at British Thomson-Houston Co. Ltd., Rugby. Both these positions were temporary ending in August 1936. Then until her marriage in 1938, she was librarian to Imperial Chemical Industries (ICI), thus changing her career from industrial science to social science. Cook's husband was an engineer from the University of Edinburgh, working on the research staff of British Thomson-Houston Co. Ltd., Rugby.
