

# CONTENTS

Preface	v
APBC 2008 Organization	vii
<b>Keynote Papers</b>	
Recent Progress in Phylogenetic Combinatorics <i>Andreas Dress</i>	1
KEGG for Medical and Pharmaceutical Applications <i>Minoru Kanehisa</i>	5
Protein Interactions Extracted from Genomes and Papers <i>Alfonso Valencia</i>	7
<b>Contributed Papers</b>	
String Kernels with Feature Selection for SVM Protein Classification <i>Wen-Yun Yang and Bao-Liang Lu</i>	9
Predicting Nucleolar Proteins Using Support-Vector Machines <i>Mikael Bodén</i>	19
Supervised Ensembles of Prediction Methods for Subcellular Localization <i>Johannes Aßfalg, Jing Gong, Hans-Peter Kriegel, Alexey Pryakhin, Tiandi Wei and Arthur Zimek</i>	29
Chemical Compound Classification with Automatically Mined Structure Patterns <i>Aaron M. Smalter, J. Huan and Gerald H. Lushington</i>	39
Structure-Approximating Design of Stable Proteins in 2D HP Model Fortified by Cysteine Monomers <i>Alireza Hadj Khodabakhshi, Ján Maňuch, Arash Rafiey and Arvind Gupta</i>	49

Discrimination of Native Folds Using Network Properties of Protein Structures	59
<i>Alper Küçükural, O. Uğur Sezerman and Aytül Erçil</i>	
Interacting Amino Acid Preferences of 3D Pattern Pairs at the Binding Sites of Transient and Obligate Protein Complexes	69
<i>Suryani Lukman, Kelvin Sim, Jinyan Li and Yi-Ping Phoebe Chen</i>	
Structural Descriptors of Protein-Protein Binding Sites	79
<i>Oliver Sander, Francisco S. Domingues, Hongbo Zhu, Thomas Lengauer and Ingolf Sommer</i>	
A Memory Efficient Algorithm for Structural Alignment of RNAs with Embedded Simple Pseudoknots	89
<i>Thomas Wong, Y. S. Chiu, Tak-Wah Lam and S. M. Yiu</i>	
A Novel Method for Reducing Computational Complexity of Whole Genome Sequence Alignment	101
<i>Ryuichiro Nakato and Osamu Gotoh</i>	
fRMSDAlign: Protein Sequence Alignment Using Predicted Local Structure Information for Pairs with Low Sequence Identity	111
<i>Huzefa Rangwala and George Karypis</i>	
Run Probability of High-Order Seed Patterns and Its Applications to Finding Good Transition Seeds	123
<i>Jialiang Yang and Louxin Zhang</i>	
Seed Optimization Is No Easier than Optimal Golomb Ruler Design	133
<i>Bin Ma and Hongyi Yao</i>	
Integrating Hierarchical Controlled Vocabularies with OWL Ontology: A Case Study from the Domain of Molecular Interactions	145
<i>Melissa J. Davis, Andrew Newman, Imran Khan, Jane Hunter and Mark A. Ragan</i>	
Semantic Similarity Definition over Gene Ontology by Further Mining of the Information Content	155
<i>Yuan-Peng Li and Bao-Liang Lu</i>	

From Text to Pathway: Corpus Annotation for Knowledge Acquisition from Biomedical Literature	165
<i>Jin-Dong Kim, Tomoko Ohta, Kanae Oda and Jun'ichi Tsujii</i>	
Classification of Protein Sequences Based on Word Segmentation Methods	177
<i>Yang Yang, Bao-Liang Lu and Wen-Yun Yang</i>	
Analysis of Structural Strand Asymmetry in Non-coding RNAs	187
<i>Jiayu Wen, Brian J. Parker and Georg F. Weiller</i>	
Finding Non-coding RNAs Through Genome-Scale Clustering	199
<i>Huei-Hun Tseng, Zasha Weinberg, Jeremy Gore, Ronald R. Breaker and Walter L. Ruzzo</i>	
A Fixed-Parameter Approach for Weighted Cluster Editing	211
<i>Sebastian Böcker, Sebastian Briesemeister, Quang Bao Anh Bui and Anke Truß</i>	
Image Compression-based Approach to Measuring the Similarity of Protein Structures	221
<i>Morihiro Hayashida and Tatsuya Akutsu</i>	
Genome Halving with Double Cut and Join	231
<i>Robert Warren and David Sankoff</i>	
Phylogenetic Reconstruction from Complete Gene Orders of Whole Genomes	241
<i>Krister M. Swenson, William Arndt, Jijun Tang and Bernard M. E. Moret</i>	
SPR-based Tree Reconciliation: Non-binary Trees and Multiple Solutions	251
<i>Cuong Than and Luay Nakhleh</i>	
Alignment of Minisatellite Maps: A Minimum Spanning Tree-based Approach	261
<i>Mohamed I. Abouelhoda, Robert Giegerich, Behshad Behzadi and Jean-Marc Steyaert</i>	
Metabolic Pathway Alignment (M-Pal) Reveals Diversity and Alternatives in Conserved Networks	273
<i>Yunlei Li, Dick de Ridder, Marco J. L. de Groot and Marcel J. T. Reinders</i>	

Automatic Modeling of Signal Pathways from Protein-Protein Interaction Networks	287
<i>Xingming Zhao, Rui-Sheng Wang, Luonan Chen and Kazuyuki Aihara</i>	
Simultaneously Segmenting Multiple Gene Expression Time Courses by Analyzing Cluster Dynamics	297
<i>Satish Tadepalli, Naren Ramakrishnan, Layne T. Watson, Bhuvaneshwar Mishra and Richard F. Helm</i>	
Symbolic Approaches for Finding Control Strategies in Boolean Networks	307
<i>Christopher James Langmead and Sumit Kumar Jha</i>	
Estimation of Population Allele Frequencies from Small Samples Containing Multiple Generations	321
<i>Dmitry A. Konovalov and Dik Heg</i>	
Linear Time Probabilistic Algorithms for the Singular Haplotype Reconstruction Problem from SNP Fragments	333
<i>Zhixiang Chen, Bin Fu, Robert Schweller, Boting Yang, Zhiyu Zhao and Binhai Zhu</i>	
Optimal Algorithm for Finding DNA Motifs with Nucleotide Adjacent Dependency	343
<i>Francis Y. L. Chin, Henry Chi Ming Leung, M. H. Siu and S. M. Yiu</i>	
Primer Selection Methods for Detection of Genomic Inversions and Deletions via PAMP	353
<i>Bhaskar DasGupta, Jin Jun and Ion I. Măndoiu</i>	
GenePC and ASPIC Integrate Gene Predictions with Expressed Sequence Alignments to Predict Alternative Transcripts	363
<i>Tyler S. Alioto, Roderic Guigó, Ernesto Picardi and Graziano Pesole</i>	
Comparing and Analysing Gene Expression Patterns Across Animal Species Using 4DXpress	373
<i>Yannick Haudry, Chuang Kee Ong, Laurence Ettwiller, Hugo Berube, Ivica Letunic, Misha Kapushesky, Paul-Daniel Weeber, Xi Wang, Julien Gagneur, Charles Girardot, Detlev Arendt, Peer Bork, Alvis Brazma, Eileen Furlong, Joachim Wittbrodt and Thorsten Henrich</i>	

Near-Sigmoid Modeling to Simultaneously Profile Genome-wide DNA Replication Timing and Efficiency in Single DNA Replication Microarray Studies	383
<i>Juntao Li, Majid Eshaghi, Jianhua Liu and Radha Krishna Murthy Karuturi</i>	
Author Index	393
