<i>Preface</i>	vii
<i>Acknowledgments</i>	xi
1. Introduction	1
1.1 Fixed-Income Securities	2
1.1.1 Valuation	2
1.1.2 Interest Rate Sensitivity	8
1.1.3 Portfolio Management	16
1.2 Portfolio Optimisation	21
1.2.1 Basic Mean-Variance Portfolio Optimisation	23
2. Option Pricing and Binomial Methods	35
2.1 Options	35
2.1.1 The No-Arbitrage Principle	38
2.2 The Binomial Model	42
2.2.1 Pricing American Options by Binomial Methods	58
2.3 An Alternative Binomial Method	64
3. Stochastic Differential Equations	71
3.1 Stochastic Itô Processes	72
3.2 Stochastic Itô Integral	84
3.2.1 Definition and Properties of the Itô Integral	91
3.3 Itô Lemma	96
3.4 Applications in Stock Market	100

4.	The Black-Scholes Equation	111
4.1	Derivation of the Black-Scholes Equation	112
4.2	Solution of the Black-Scholes Equation	116
4.2.1	Transforming to the Heat Equation	117
4.2.2	Closed-Form Solutions of European Call and Put Options	120
4.3	Hedging Portfolios: The Greeks	126
4.4	Implied Volatility	133
5.	Random Numbers and Monte Carlo Simulation	139
5.1	Pseudo-Random Numbers	140
5.2	Transformation of Random Variables	144
5.2.1	Inverse Transform Method	146
5.2.2	Acceptance-Rejection Method	149
5.3	Generating Normal Variates	151
5.3.1	Box-Muller Method	152
5.3.2	The Polar Method of Marsaglia	154
5.3.3	Multivariate Normal Variables	156
5.4	Monte Carlo Integration	160
5.5	Option Pricing by Monte Carlo Simulation	166
5.5.1	Correlated Assets	172
5.6	Variance Reduction Techniques	178
5.6.1	Antithetic Variates	178
5.6.2	Control Variates	182
5.7	Quasi-Monte Carlo Simulation	188
5.7.1	Halton Sequences	189
6.	Option Pricing by Partial Differential Equations	195
6.1	Classification of PDEs	196
6.2	Finite Difference Methods for Parabolic Equations	200
6.2.1	An Explicit Method	203
6.2.2	An Implicit Method	215
6.2.3	Crank-Nicolson Method	220
6.3	Option Pricing by the Heat Equation	226
6.4	Option Pricing by the Black-Scholes Equation	234
6.4.1	Pricing by an Explicit Method	235
6.4.2	Pricing by an Implicit Method	239
6.4.3	Pricing by the Crank-Nicolson Method	241

6.5	Pricing American Options	245
6.5.1	Projected SOR Method for American Options . .	249
6.6	Tree Methods and Finite Differences	256
6.6.1	A Trinomial Tree	259
6.6.2	A Binomial Tree	260
Appendix A A Short Introduction to MATLAB		263
A.1	Getting Started	264
A.1.1	Variables	265
A.2	Matrices and Vectors	266
A.2.1	Operations on Matrices	271
A.3	Graphics	272
A.3.1	Three-Dimensional Plots	275
A.4	Programming in MATLAB: <i>Scripts</i> and <i>functions</i>	278
A.4.1	Programming	281
A.4.2	Vectorisation	286
<i>Bibliography</i>		289
<i>Index</i>		295
