

Contents

<i>Preface</i>	v
1. Computation, Information, and the Arrow of Time <i>P. Adriaans & P. van Emde Boas</i>	1
2. The Isomorphism Conjecture for NP <i>M. Agrawal</i>	19
3. The Ershov Hierarchy <i>M. M. Arslanov</i>	49
4. Complexity and Approximation in Reoptimization <i>G. Ausiello, V. Bonifaci, & B. Escoffier</i>	101
5. Definability in the Real Universe <i>S. B. Cooper</i>	131
6. HF-Computability <i>Y. L. Ershov, V. G. Puzarenko, & A. I. Stukachev</i>	169
7. The Mathematics of Computing between Logic and Physics <i>G. Longo & T. Paul</i>	243

8.	Liquid State Machines: Motivation, Theory, and Applications	275
	<i>W. Maass</i>	
9.	Experiments on an Internal Approach to Typed Algorithms in Analysis	297
	<i>D. Normann</i>	
10.	Recursive Functions: An Archeological Look	329
	<i>P. Odifreddi</i>	
11.	Reverse Mathematics and Well-ordering Principles	351
	<i>M. Rathjen & A. Weiermann</i>	
12.	Discrete Transfinite Computation Models	371
	<i>P. D. Welch</i>
