

## FOREWORD

The RECOMB Regulatory Genomics workshop continues the tradition of previous RECOMB satellite meetings, which are focussed workshops on topics of particular interest to the computational biology community – in this case, Regulatory Genomics. The workshop is an annual forum that brings together the diverse group of researchers in the field – with talks from leading researchers and submitted papers and posters on latest research results. The attendees will also be able to take the opportunity to share research results and exchange ideas. We hope that many collaborations will be born among the attendees.

The Third RECOMB Regulatory Genomics workshop will be held in Singapore at the National University of Singapore (NUS) on 17–18 July 2006. The workshop is organised as one of the activities within a two-month *Program of Algorithmic Biology: Algorithmic Techniques in Computational Biology* held in June–July 2006 at the Institute for Mathematical Sciences (IMS) of the National University of Singapore. The program also includes a *Workshop on BioAlgorithmics* (July 12–14), two tutorials (July 11 and 21), a Math-CS Camp for high school students (July 19), and a public lecture on *The Role of Mathematics and Computer Science in Computational Biology* (July 19).

The organisers of the workshop would like to express their gratitude to the invited speakers and the authors of the submitted papers and posters, the members of the programme committee and the additional external reviewers, members of the organising and the local arrangement committees, and the participants for their respective contributions to this workshop.

Finally, the Third RECOMB Satellite Workshop on Regulatory Genomics would not have been possible with the generous support of the following: the National University of Singapore – Institute for Mathematical Sciences (IMS), the School of Computing (SOC), and the Office of Life Sciences (OLS); the Association for Medical and Bio-Informatics, Singapore (AMBIS); and the Genome Institute of Singapore (GIS).
