[Introduction au calcul des variations. English]

Introduction to the calculus of variations / by Bernard Dacorogna. -- 2nd ed.

p. cm.

Includes bibliographical references and index.

ISBN-13: 978-1-84816-333-1 (hardcover : alk. paper)

ISBN-10: 1-84816-333-9 (hardcover : alk. paper)

ISBN-13: 978-1-84816-334-8 (pbk. : alk. paper)

ISBN-10: 1-84816-334-7 (pbk. : alk. paper)

1. Calculus of variations. I. Title.

QA315.D3413 2009

Contents

Prefaces to the English Edition	ix
Preface to the French Edition	xi
0 Introduction	1
0.1 Brief historical comments	1
0.2 Model problem and some examples	3
0.3 Presentation of the content of the monograph	7
1 Preliminaries	13
1.1 Introduction	13
1.2 Continuous and Hölder continuous functions	14
1.2.1 Exercises	18
1.3 L^p spaces	19
1.3.1 Exercises	26
1.4 Sobolev spaces	29
1.4.1 Exercises	42
1.5 Convex analysis	45
1.5.1 Exercises	48
2 Classical methods	51
2.1 Introduction	51
2.2 Euler-Lagrange equation	53
2.2.1 Exercises	64
2.3 Second form of the Euler-Lagrange equation	66
2.3.1 Exercises	68
2.4 Hamiltonian formulation	69
2.4.1 Exercises	76
2.5 Hamilton-Jacobi equation	77
2.5.1 Exercises	81

2.6	Fields theories	81
2.6.1	Exercises	86
3	Direct methods: existence	87
3.1	Introduction	87
3.2	The model case: Dirichlet integral	89
3.2.1	Exercise	92
3.3	A general existence theorem	92
3.3.1	Exercises	99
3.4	Euler-Lagrange equation	101
3.4.1	Exercises	107
3.5	The vectorial case	107
3.5.1	Exercises	115
3.6	Relaxation theory	118
3.6.1	Exercises	121
4	Direct methods: regularity	125
4.1	Introduction	125
4.2	The one dimensional case	126
4.2.1	Exercises	131
4.3	The difference quotient method: interior regularity	133
4.3.1	Exercises	139
4.4	The difference quotient method: boundary regularity	140
4.4.1	Exercise	143
4.5	Higher regularity for the Dirichlet integral	144
4.5.1	Exercises	146
4.6	Weyl lemma	147
4.6.1	Exercise	150
4.7	Some general results	150
4.7.1	Exercises	152
5	Minimal surfaces	155
5.1	Introduction	155
5.2	Generalities about surfaces	158
5.2.1	Exercises	166
5.3	The Douglas-Courant-Tonelli method	167
5.3.1	Exercise	173
5.4	Regularity, uniqueness and non-uniqueness	173
5.5	Nonparametric minimal surfaces	175
5.5.1	Exercise	180

6	Isoperimetric inequality	181
6.1	Introduction	181
6.2	The case of dimension 2	182
6.2.1	Exercises	188
6.3	The case of dimension n	189
6.3.1	Exercises	196
7	Solutions to the Exercises	199
7.1	Chapter 1. Preliminaries	199
7.1.1	Continuous and Hölder continuous functions	199
7.1.2	L^p spaces	203
7.1.3	Sobolev spaces	210
7.1.4	Convex analysis	217
7.2	Chapter 2. Classical methods	224
7.2.1	Euler-Lagrange equation	224
7.2.2	Second form of the Euler-Lagrange equation	230
7.2.3	Hamiltonian formulation	231
7.2.4	Hamilton-Jacobi equation	232
7.2.5	Fields theories	234
7.3	Chapter 3. Direct methods: existence	236
7.3.1	The model case: Dirichlet integral	236
7.3.2	A general existence theorem	236
7.3.3	Euler-Lagrange equation	239
7.3.4	The vectorial case	240
7.3.5	Relaxation theory	247
7.4	Chapter 4. Direct methods: regularity	251
7.4.1	The one dimensional case	251
7.4.2	The difference quotient method: interior regularity	254
7.4.3	The difference quotient method: boundary regularity	256
7.4.4	Higher regularity for the Dirichlet integral	257
7.4.5	Weyl lemma	259
7.4.6	Some general results	260
7.5	Chapter 5. Minimal surfaces	263
7.5.1	Generalities about surfaces	263
7.5.2	The Douglas-Courant-Tonelli method	266
7.5.3	Nonparametric minimal surfaces	267
7.6	Chapter 6. Isoperimetric inequality	268
7.6.1	The case of dimension 2	268
7.6.2	The case of dimension n	271
	Bibliography	275
