Preface	v
1. Introduction About 1,1'-Binaphthyls	1
References	10
2. Main Chain Chiral-Conjugated Polymers	13
2.1. Introduction About Chiral-Conjugated Polymers	13
2.2. Binaphthyl-Based Polyarylenevinylenes	17
2.3. Binaphthyl-Based Polyarylenes	20
2.4. Binaphthyl-Based Polyaryleneethynylenes	23
2.5. Binaphthyl-Thiophene Copolymers	30
2.6. Copolymers of BINAM and Thiophene-Containing Conjugated Linkers	37
2.7. Polybinaphthyls Without Conjugated Linkers	39
2.8. Propeller-Like Polybinaphthyls	51
2.9. Dipole-Oriented Propeller-Like Polymers	69
2.10. Binaphthyl-Based Polysalophens	71
2.11. Helical Ladder Polybinaphthyls	76
References	85
3. Polybinaphthyls in Asymmetric Catalysis	87
3.1. Introduction about Chiral Polymers in Asymmetric Catalysis	87
3.2. Synthesis of Major-Groove Poly(BINOL)s	89

3.3.	Application of the Major-Groove Poly(BINOL)s to Catalyze the Mukaiyama Aldol Reaction	95
3.4.	Application of the Major-Groove Poly(BINOL)s to Catalyze the Hetero-Diels–Alder Reaction	99
3.5.	Using the Ti(IV) Complex of the Major-Groove Poly(BINOL) to Catalyze the Diethylzinc Addition to Aldehydes	101
3.6.	Synthesis of the Minor-Groove Poly(BINOL)s	102
3.7.	Application of the Major- and Minor-Groove Poly(BINOL)s to Catalyze the Asymmetric Organozinc Addition to Aldehydes	105
3.8.	Asymmetric Reduction of Prochiral Ketones Catalyzed by the Chiral BINOL Monomer and Polymer Catalysts	122
3.9.	Asymmetric Epoxidation of α, β -Unsaturated Ketones Catalyzed by the Minor- and Major-Groove Poly(BINOL)s	125
3.10.	Asymmetric Diels–Alder Reaction Catalyzed by Poly(BINOL)–B(III) Complexes	133
3.11.	1,3-Dipolar Cycloaddition Catalyzed by the Minor- and Major-Groove Poly(BINOL)–Al(III) Complexes	136
3.12.	Asymmetric Michael Addition Catalyzed by the Poly(BINOL)s	139
3.13.	Synthesis and Study of Poly(BINAP)	141
3.14.	Synthesis and Study of a BINOL–BINAP Copolymer	146
	References	150
4.	Asymmetric Catalysis by BINOL and Its Non-polymeric Derivatives	151
4.1.	Introduction	151
4.2.	Asymmetric Alkyne Additions to Aldehydes	151
4.3.	Asymmetric Arylzinc Addition to Aldehydes	198
4.4.	Asymmetric Alkylzinc Addition to Aldehydes	216
4.5.	Asymmetric TMSCN Addition to Aldehydes	225
4.6.	Asymmetric Hetero-Diels–Alder Reaction	233
	References	235

5. Enantioselective Fluorescent Sensors Based on 1,1'-Binaphthyl-Derived Dendrimers, Small Molecules and Macrocycles	239
5.1. Introduction	239
5.2. Using Phenyleneethynylene-BINOL Dendrimers for the Recognition of Amino Alcohols	240
5.3. Using Phenylene-BINOL Dendrimers for the Recognition of Chiral Amino Alcohols	246
5.4. Using Functionalized BINOLs for the Recognition of Amino Alcohols and Amines	252
5.5. Using Acyclic Bisbinaphthyls for the Recognition of α -Hydroxycarboxylic Acids and Amino Acid Derivatives	257
5.6. Using Diphenylethylenediamine-BINOL Macrocycles for the Recognition of α -Hydroxycarboxylic Acids	263
5.7. Using Cyclohexanediamine-BINOL Macrocycles and Their Derivatives for the Recognition of α -Hydroxycarboxylic Acids and Amino Acid Derivatives	282
5.8. Application of the Cyclohexanediamine-BINOL Macrocyclic Sensor in Catalyst Screening ³¹	294
5.9. Using Monobinaphthyl Compounds for the Recognition of α -Hydroxycarboxylic Acids and Amino Acid Derivatives	299
5.10. Enantioselective Precipitation and Solid-State Fluorescence Enhancement in the Recognition of α -Hydroxycarboxylic Acids by Using Monobinaphthyl Compounds	303
References	308
6. Miscellaneous Studies on Materials Related to 1,1'-Binaphthyls	311
6.1. Chiral Molecular Wires	311
6.2. A Biphenol Polymer	316
6.3. Supramolecular Chemistry of Self-Assembly of Racemic and Optically Active Propargylic Alcohols	318
References	331
Index	333
