

Contents

Introduction		1
Chapter 1	The Elements of Nature	5
Chapter 2	Early Ideas of the Nature of Matter	11
Chapter 3	The Quest for Gold and Eternal Life	17
Chapter 4	The Beginning of Chemistry	23
	4.1 The Chaos of Alchemy	23
	4.2 Paracelsus and His Medicines	24
	4.3 Robert Boyle, the Gentleman Scientist	25
Chapter 5	Modern Chemistry is Born	31
	5.1 The Phlogiston Theory	31
	5.2 Joseph Priestley	32
	5.3 Antoine Lavoisier	36
Chapter 6	Nineteenth Century Chemistry	41
	6.1 Chemistry Becomes Quantitative	41
	6.2 John Dalton	42
	6.3 Amedeo Avogadro	45

6.4	The Concept of Valency	47
6.5	Chemical Industry is Born	48
6.6	Bringing Order to the Elements	50
Chapter 7	Atoms Have Structure	53
7.1	Michael Faraday	53
7.2	The Nature of Cathode Rays	55
7.3	J. J. Thomson and the Electron	58
7.4	The Charge and Mass of the Electron	61
Chapter 8	Radioactivity and the Plum-Pudding Model	65
8.1	Röntgen and X-rays	65
8.2	Becquerel and Emanations from Uranium	68
8.3	The Curies and Radioactivity	70
8.4	Rutherford and the Nuclear Atom	71
Chapter 9	Some Early 20th Century Physics	77
9.1	The Birth of Quantum Physics	77
9.2	The Photoelectric Effect	80
9.3	Characteristic X-rays	82
Chapter 10	What is a Nucleus Made Of?	85
10.1	First Ideas on the Nature of the Nucleus	85
10.2	Moseley's Contribution to Understanding Atomic Numbers	86
10.3	Breaking Up the Nucleus	89
10.4	Another Particle is Found	91
Chapter 11	Electrons in Atoms	95
11.1	The Bohr Atom	95
11.2	Waves and Particles	99
11.3	The Bohr Theory and Waves	101
11.4	An Improvement of the Bohr Theory	103

Chapter 12	The New Mechanics	107
	12.1 Schrödinger's Wave Equation	107
	12.2 The Wave Equation and Intuition	109
	12.3 Orbits Become Orbitals	112
	12.4 The Great Escape	116
	12.5 Heisenberg and Uncertainty	118
Chapter 13	Electrons and Chemistry	121
	13.1 Shells and the Periodic Table	121
	13.2 Valency	125
Chapter 14	Electron Spin and the Exclusion Principle	129
	14.1 The Stern–Gerlach Experiment	129
	14.2 Electrons in a Spin	131
	14.3 The Pauli Exclusion Principle	133
Chapter 15	Isotopes	135
	15.1 What is an Isotope?	135
	15.2 The Stable Isotopes of Some Common Materials	136
Chapter 16	Radioactivity and More Particles	141
	16.1 The Emission of α Particles	141
	16.2 β Emission	143
	16.3 The Positron	144
	16.4 Another Kind of β Emitter	147
	16.5 The Elusive Particle — The Neutrino	148
	16.6 How Old is that Ancient Artefact?	152
	16.7 An Interim Assessment of the Nature of Matter	153
Chapter 17	Making Atoms, Explosions and Power	155
	17.1 The New Alchemy	155
	17.2 Reactions with α Particles	155

	17.3	Reactions with Protons	157
	17.4	γ -ray Induced Reactions	157
	17.5	Neutron Induced Reactions	158
	17.6	Fission Reactions	159
	17.7	The Atomic Bomb	162
	17.8	Atomic Power	165
	17.9	Fusion — Better Power Production and Bigger Bombs	166
Chapter 18		Observing Matter on a Small Scale	169
	18.1	Seeing	169
	18.2	Microscopes	171
	18.3	X-ray Diffraction from Crystals	176
Chapter 19		Living Matter	183
	19.1	Defining Life	183
	19.2	Forms of Life	187
Chapter 20		Life at the Atomic Level	195
	20.1	Seeing Life Matter at the Atomic Level	195
	20.2	Encoding Complex Structures	197
	20.3	Encoding Living Matter — The Chemistry of DNA	198
	20.4	The Double Helix	203
	20.5	What Makes Us How We Are?	207
	20.6	The Artificial Manipulation of Genes	210
Chapter 21		Materials from Ancient Times	213
	21.1	The Earliest Use of Natural Materials — The Stone Age	213
	21.2	Some Early Manufactured Materials — The Bronze Age	215
	21.3	The Iron Age	222
	21.4	Cement and Concrete	227
	21.5	Clothing Materials	230

Chapter 22	Modern Materials	237
	22.1 Materials Old and New	237
	22.2 Manufactured Fibres, Synthetic Fibres and Plastics	238
	22.3 Semiconductors	245
	22.4 Nanotechnology	250
Chapter 23	The Fantastic World of Particles	255
	23.1 Antics on Ice	255
	23.2 The First Designed Atom-Smasher	259
	23.3 The Cyclotron	261
	23.4 The Stanford Linear Accelerator	262
	23.5 Synchrotrons and the Large Hadron Collider	263
	23.6 Some Fundamental Particles	267
Chapter 24	How Matter Began	273
	24.1 Wailing Sirens	273
	24.2 Measuring the Universe	275
	24.3 The Expanding Universe	278
	24.4 The Big Bang Hypothesis	280
	24.5 The Creation of Matter	281
Chapter 25	Making Heavier Elements	287
	25.1 The Architecture of the Universe	287
	25.2 Dark Matter and Dark Energy	290
	25.3 The Formation of a Star	291
	25.4 The Death of a Star	294
	25.5 The Evolving Universe	299
Index		305
