Preface	v
1. Deborah Duen Ling Chung: Innovator in Engineering Materials Use	1
1.1 Introduction by the Editor	1
1.1.1 Use of engineering materials	1
1.1.2 Scientific contributions of Dr. Chung	2
1.1.3 Honors received by Dr. Chung	3
1.1.4 Career development of Dr. Chung	3
1.2 Dr. Chung's Description of Her Life Experience	5
1.2.1 In school in Hong Kong	5
1.2.2 In university in USA	9
1.2.3 Research in graphite	11
1.2.4 Research in smart concrete	14
1.2.5 Research in materials for electromagnetic interference shielding	15
1.2.6 Research in materials for microelectronic cooling	16
1.2.7 Outreach as a scientist	18
1.2.8 Reflections of my 30-year career	20
2. James Chen Min Li: Leader in the Science of Engineering Materials	21
2.1 Introduction by the Editor	21
2.1.1 What are engineering materials?	21
2.1.2 What is the science of engineering materials?	22
2.1.3 Scientific contributions of Dr. Li	22
2.1.4 Honors received by Dr. Li	23
2.1.5 Career development of Dr. Li	23
2.2 Dr. Li's Description of His Life Experience	24
2.2.1 Read the literature (1)	24
2.2.2 Read the literature (2)	25
2.2.3 Read the literature (3)	26
2.2.4 Take the challenge (1)	27

2.2.5	Take the challenge (2)	29
2.2.6	Take the challenge (3)	30
2.2.7	Take a calculated risk	30
2.2.8	Benefit from group discussions	31
2.2.9	Benefit from a group study	32
2.2.10	Interact with others	34
2.2.11	Note of general concerns	35
2.2.12	Verify a famous equation	36
2.2.13	Follow your intuition	37
2.2.14	Plan a group attack	38
2.2.15	Know your students	38
2.2.16	Work hard	42
2.2.17	Prepare yourself	43
2.2.18	Get good grades	45
2.2.19	Marry the right person and educate your children	47
2.2.20	Get the proper rest	48
2.2.21	Work across disciplines	48
2.2.22	Summary	49
	References	49
3.	Paul Ching-Wu Chu: Inventor of High Temperature Superconductor	51
3.1	Introduction by the Editor	51
3.1.1	What is a superconductor?	51
3.1.2	Invention of Dr. Chu	52
3.1.3	Contributions of Dr. Chu to science	54
3.1.4	Contributions of Dr. Chu to education and research organization	54
3.1.5	Honors received by Dr. Chu	55
3.1.6	Career development of Dr. Chu	56
3.2	Dr. Chu's Description of His Life Experience	57
3.2.1	Happy boyhood in Ching-Shui	57
3.2.2	Great teachers in Taiwan	60
3.2.3	Great teachers in the U.S.	61
3.2.4	The torturous path to high temperature superconductivity (HTS)	65
3.2.4.1	Before 1986	65
3.2.4.2	The critical year of 1986	67
3.2.4.3	The exciting 1987 & the "Woodstock of Physics"	69
3.2.4.4	After 1987 – continued excitements	75
3.2.5	University presidency	76

4. Eli Ruckenstein: Leader in Chemical Process Development	77
4.1 Introduction by the Editor	77
4.1.1 What is chemical process development?	77
4.1.2 Scientific contributions of Dr. Ruckenstein.	78
4.1.3 Honors received by Dr. Ruckenstein	78
4.1.4 Career development of Dr. Ruckenstein.	80
4.2 Dr. Ruckenstein's Description of His Life Experience.	80
5. Jennie S. Hwang: Pioneer in Surface Mount Technology and Environment-Friendly Lead-Free Electronics	91
5.1 Introduction by the Editor	91
5.1.1 What is surface mount technology?	91
5.1.2 What is environment-friendly lead-free electronics?	91
5.1.3 Honors and recognition received by Dr. Hwang.	92
5.1.4 Contributions of Dr. Hwang in technology and scholarship.	94
5.1.5 Contributions of Dr. Hwang in business	96
5.1.6 Contributions of Dr. Hwang in civic and professional services.	97
5.1.7 Formal education of Dr. Hwang	98
5.2 Dr. Hwang's Description of Her Life Experience	98
5.2.1 The first stage – schooling and preparing for the future	98
5.2.2 The second stage – intellectual maturation and growth.	101
5.2.3 The third stage – a time to contribute with what has been learned	102
5.2.4 Work and family.	104
5.2.5 Thoughts on opportunity	109
5.2.6 Reading, writing and speaking.	111
5.2.7 Thoughts on globalization.	114
5.2.8 Thoughts on future workforce	116
5.2.9 Thoughts on engineering education	117
5.2.10 Thoughts on practical knowledge and entrepreneurship	119
5.2.11 Thoughts on leadership	120
5.2.12 Pioneering and long-standing work in SMT	121
5.2.13 Leadership in environment-friendly lead-free electronics.	123
5.2.13.1 Development of lead-free electronics.	123
5.2.13.2 What made the commercial success?	124
5.2.14 Prime of life – into the future	125
6. Douglas D. Osheroff: Winner of the 1996 Nobel Prize in Physics	129
6.1 Introduction by the Editor	129
6.1.1 The Nobel Prize	129

6.1.2	What is superfluidity in helium-3	130
6.1.3	Scientific contributions of Dr. Osheroff	130
6.1.4	Honors received by Dr. Osheroff.....	131
6.1.5	Career development of Dr. Osheroff.....	132
6.2	Dr. Osheroff's Description of His Life Experience.....	132
7.	Klaus Biemann: The Father of Organic Mass Spectrometry	143
7.1	Introduction by the Editor	143
7.1.1	What is organic mass spectrometry.....	143
7.1.2	Scientific contributions of Dr. Biemann.....	144
7.1.3	Honors received by Dr. Biemann	145
7.1.4	Career development of Dr. Biemann	145
7.2	Dr. Biemann's Description of His Life Experience.....	145
7.2.1	Student years	146
7.2.2	Moving to MIT.....	150
7.2.3	Starting the academic career.....	152
7.2.4	Learning about mass spectrometry	154
7.2.5	Alkaloids	159
7.2.6	Nationwide collaborations	166
7.2.7	Combining gas chromatography with mass spectrometry (GCMS)	167
7.2.8	Peptides and proteins.....	170
7.2.9	Moon and Mars.....	173
7.2.10	Epilogue	174
7.3	Appendix A: Muscopyridine	176
7.4	Appendix B: Sarpagine	177
7.5	Appendix C: Peptides and Proteins	179
8.	James W. Mayer: Pioneer in Semiconductor Device Development	181
8.1	Introduction by the Editor	181
8.1.1	What is a semiconductor device?	181
8.1.2	Scientific contribution of Dr. Mayer.....	183
8.1.3	Educational contribution of Dr. Mayer.....	183
8.1.4	Honors received by Dr. Mayer	184
8.1.5	Career development of Dr. Mayer.....	184
8.2	Dr. Mayer's Description of His Life Experience	184
9.	Herbert A. Hauptman: Winner of the 1985 Nobel Prize in Chemistry	199
9.1	Introduction by the Editor	199
9.1.1	Nobel Prize in Chemistry	199
9.1.2	Scientific contributions of Dr. Hauptman	200
9.1.3	Honors received by Dr. Hauptman	201

9.1.4	Career development of Dr. Hauptman	202
9.2	Dr. Hauptman's Descriptions of His Life Experience.....	206
10.	Agnes Oberlin: Leader in Analyzing the Structure of Carbon Materials	209
10.1	Introduction by the Editor	209
10.1.1	What are carbon materials?	209
10.1.2	What is the structure of carbons?	210
10.1.3	Scientific contributions of Dr. Oberlin.....	211
10.1.4	Honors received by Dr. Oberlin.....	212
10.1.5	Career development of Dr. Oberlin.....	213
10.2	Dr. Oberlin's Description of Her Life Experience.....	213
	<i>Index</i>	225
