

Rudolf Huebener earned his PhD in physics in 1958 from the University of Marburg. After holding research positions in Karlsruhe and New York he worked 12 years at the Argonne National Laboratory in Illinois, USA. In 1974 he accepted a professorship of Experimental Physics at the University of Tübingen, which he kept until his retirement in 1999. For his scientific achievements he was awarded the Max Planck Research Prize in 1992 and the Cryogenics Prize in 2001. Rudolf Huebener published several books, for example "Magnetic Flux Structures in Superconductors", 2nd edition (2001), "Electrons in Action" (2005), and "Walther Nernst: Pioneer of Physics and of Chemistry" (2007 together with H-G Bartel).
