

Angelo Bianchi did his graduate work in natural and biological sciences in 1948 and 1950, respectively, at the University of Pavia. In 1954, he was conferred a professorship by the Italian Ministry of Education. From 1955, he was a post-doctoral fellow in genetics at several locations, including the universities of Pavia, Piacenza, Milano and Harvard, as well as at the Brookhaven National Laboratory. After 12 years in academia (the universities of Pavia, Piacenza and Milano), Professor Bianchi moved to Italian government research institutions, where he has held a number of positions in plant breeding management. Currently the past director of the National Italian Institute for Cereal Crops, he has published and lectured extensively on the subject of maize genetics and breeding. He is also the editor of two journals, *Genetics and Breeding* and *Maydica*.
