

**Chen Sow-Hsin** is a Professor of Nuclear Science and Engineering at the Massachusetts Institute of Technology. He is the recipient of 2008 Clifford G Shull Prize from the Neutron Scattering Society of America for seminal contributions to understanding the dynamical properties of supercooled and interfacial water using neutron scattering techniques, and for an exceptional record of training young scientists. His research interests include Scattering Theory, Thermal Neutron and X-ray Scattering Spectroscopy and Laser Photon Correlation Spectroscopy, Statistical Thermodynamics of Simple and Complex Liquids.
