Preface	vii
Chapter 1 Introduction	1
1.1 Formulation of the problem	1
1.2 Waves on fluid of finite depth	10
1.3 Primary bifurcation from the trivial flow	13
1.4 Analyticity of the free boundary	18
1.5 The case where bottom is not flat	20
1.6 Three dimensional waves	21
1.7 Remarks on equilibrium capillary surface	22
1.8 Types of bifurcation	23
1.9 Proof of Proposition 1.1	25
1.10 List of Symbols	28
Chapter 2 Pure Capillary Waves	31
2.1 Pure capillary waves on water of infinite depth	31
2.2 Uniqueness of Crapper's wave	36
2.3 Pure capillary waves in fluid of finite depth	42
Chapter 3 Gravity Waves	49
3.1 Gravity waves of infinite depth	49
3.2 Stokes' highest wave	52
3.3 Method of H. Yamada	59
3.3.1 Implementation of Yamada's iteration	62
3.4 Global branch	63

3.5	Stokes Expansion	66
3.6	Longuet-Higgins' method	67
3.7	Babenko's method	71
3.8	A remark on the secondary bifurcation	73
3.9	Garabedian's theorem	74
3.10	A remark on nonsymmetric waves	79
3.11	A remark on non-flat bottom	80
Chapter 4 Capillary-Gravity Waves		83
4.1	Numerical solutions of mode (1,2)	83
4.2	Structure of the set of capillary-gravity waves	86
4.3	$O(2)$ -equivariance	91
4.4	Bifurcation equation of mode (1,2)	95
4.5	Numerical results for mode (1,3)	104
4.6	Bifurcation equation of mode (1,3)	104
4.7	Remarks on the waves on water of finite depth	114
4.8	Nonsymmetric wave	115
4.9	Numerical method	117
Chapter 5 Numerical Solutions of Mode (1,4) and (2,3)		119
5.1	Bifurcation of mode (1,4)	119
5.2	Solutions when p is small	128
5.3	Bifurcations of mode (2,3)	129
5.4	Concluding remark	132
Chapter 6 Waves of Negative Parameters		137
6.1	Negative surface tension	137
6.2	Numerical experiment	138
6.3	Limit wave	139
6.4	Secondary bifurcation	142
6.5	Negative p	142
6.6	Conclusion	143
Chapter 7 Rotational Wave		147
7.1	Introduction	147
7.2	Physical meaning of the equations	149
7.3	Pseudo-potential	150
7.4	Differential equations	152

7.5	Change of variables	154
7.6	Trivial flows	155
7.7	The case where the depth is finite	156
7.8	Gerstner's trochoidal waves	156
7.9	The case where the vorticity is constant	158
7.10	Numerical results	162
Chapter 8 Interfacial Progressive Waves		171
8.1	Introduction	171
8.2	The fundamental equation	172
8.3	Function spaces	178
8.4	Bifurcation equation	180
8.5	Bifurcation equation of mode (1,2)	185
8.6	Existence of Degenerate Bifurcation Point	186
8.7	The triple bifurcation point	191
8.8	The case where $\epsilon\delta = 0$	192
8.9	Numerical experiment	193
Chapter 9 Solitary Waves		197
9.1	Solitary wave	197
9.2	Yamada's equation for solitary waves	202
9.3	Yamada's unified equation	204
9.4	Solitary gravity waves	208
9.5	Solitary waves on deep water	211
9.6	Interfacial solitary waves	213
Bibliography		217
Index		229
