

Contents

1	Fundamental of Calculus	1
1.1	Functions and Their Graphs	1
1.2	The Number e	5
1.3	Integral and Natural Logarithm	9
1.4	Harmonic Series	12
2	How to Calculate π	15
2.1	Method of Numerical Integral	15
2.2	Method of Using Taylor Series	17
2.3	Monte Carlo Method	19
3	Best Approximations by Fractions	23
3.1	Best Approximation of an Irrational Number by Fractions	24
3.2	Frequency Ratio of the Musical Notes	25
3.3	Expanding Real Numbers into Continued Fractions	26
3.4	Calculating the Value of Logarithm	30
3.5	Integer Solutions of Binary Linear Equations	33
4	Sequences and Series	39
4.1	The Fibonacci Sequence	40
4.2	Harmonic Series	43
4.3	Questions	44

5	Prime Numbers	49
5.1	Discrimination and Calculation of Prime Numbers	49
5.2	Formula of Producing Prime Numbers	53
5.3	Distribution of Prime Numbers	55
5.4	Further Problems	57
6	The Probability	61
6.1	The Classical Definition of Probability	61
6.2	The Statistical Definition of Probability	64
6.3	Binomial Distribution and Poisson Distribution	67
6.4	Normal Distribution	70
6.5	The First Arc Sine Law	71
7	Geometric Transformations	73
7.1	Linear Transformations and Affine Transformations	74
7.2	Eigenvectors of Linear Transformations	77
7.3	Projective Transformations	81
7.4	Non-Euclidean Geometry	83
7.5	A Proof of the Fundamental Theorem in Algebra	88
8	Celestial Movement	95
8.1	Acceleration of the Planetary Motion	96
8.2	Celestial Movement under the Universal Gravitation	99
8.3	Mathematical Simulation of Other Physical Phenomena	104
9	Iteration(I)—Finding Solutions to Equations	113
9.1	Finding Roots of Equations	113
9.2	Iterative Solutions to Linear Equations Sets	116
9.3	Iterative Solutions to Nonlinear Equations Sets	119
10	Optimization	125
10.1	The Law of Light's Refraction	125
10.2	Dashing for the Optimal Point	133
10.3	Least Squares Method	138
11	Brachistochrone	143
11.1	Calculation of Time	143
11.2	Looking for the Brachistochrone	146

11.3	The Figure of the Brachistochrone	147
11.4	Tautochrone	151
12	Iteration(II) — Fractal	159
12.1	Creation Element	160
12.2	Iteration of Complex Function	164
12.3	IFS Iteration	167
13	Iteration(III) — Chaos	179
13.1	The Periodic Point and Periodic Orbit	179
13.2	Iteration of Quadratic Functions	180
13.3	The Feigenbaum Diagram	181
13.4	Properties of Chaos	182
13.4.1	Sensitivity to the Initial Values	183
13.4.2	Chaos Is Not Random	183
13.5	Iteration of Other Functions	184
13.6	Listening to Chaos	185
14	Cryptography	189
14.1	Monoalphabetic Cipher	189
14.2	Polyalphabetic Cipher	191
14.3	Modern Stream Cipher	194
14.4	Public Keys	198
15	Mechanical Proving of Elementary Geometrical Theorems	203
15.1	Converting Geometrical Problems to Algebraic Ones . . .	204
15.2	Derivation and Proving of Algebraic Relational Expressions	208
	<i>Bibliography</i>	217
