

CONTENTS

Preface	v
Linearity in Non-Linear Situations <i>R. M. Aron</i>	1
Alexander Grothendieck's Work on Functional Analysis <i>F. Bombal</i>	16
The Hardy–Littlewood Maximal Function and Some of Its Variants <i>J. Duoandikoetxea</i>	37
Linear Dynamics <i>G. Godefroy</i>	57
Greedy Algorithms and Bases from the Point of View of Banach Space Theory <i>N. J. Kalton</i>	76
On the Hahn–Banach Theorem <i>L. Narici</i>	87
Spectral Properties of Cesàro-like Operators <i>M. M. Neumann</i>	123
Tribute to Miguel de Guzmán: Reflections on Mathematical Education Centered on the Mathematical Analysis <i>B. Rubio Segovia</i>	141
On Certain Spaces of Holomorphic Functions <i>M. Valdivia</i>	151
Classical Potential Theory and Analytic Capacity <i>J. Verdera</i>	174
Best Approximations on Small Regions — A General Approach <i>F. Zó and H. H. Cuenya</i>	193
