

# Contents

## Preface

## Invited Talks

<i>Jin Cheng, Mourad Choulli, Xin Yang: An Iterative BEM for the Inverse Problem of Detecting Corrosion in a Pipe</i> .....	1
<i>Weinan E, Pingbing Ming: Analysis of the Local Quasicontinuum Method</i> .....	18
<i>Houde Han: The Artificial Boundary Method—Numerical Solutions of Partial Differential Equations on Unbounded Domains</i> .....	33
<i>Kerstin Hesse, Ian H. Sloan: Optimal order integration on the sphere</i> .....	59
<i>Jialin Hong: A Survey of Multi-symplectic Runge-Kutta Type Methods for Hamiltonian Partial Differential Equations</i> .....	71
<i>Ming Jiang, Yi Li, Ge Wang: Inverse Problems in Bioluminescence Tomography</i> .....	114
<i>Fangting Li, Ying Lu, Chao Tang, Qi Ouyang: Global Dynamic Properties of Protein Networks</i> .....	149
<i>Wei Li, Yunqing Huang: A Modified Adaptive Algebraic Multigrid Algorithm for Elliptic Obstacle Problems</i> .....	160
<i>Zeyao Mo: Parallel Algorithms and Implementation Techniques for Terascale Numerical Simulations of Typical Applications</i> .....	179
<i>Yaguang Wang: Long Time Behaviour of Solutions to Linear</i>	

Thermoelastic Systems with Second Sound.....	191
--	-----

**Contributed Talks**

<i>Hongxuan Huang, Changjun Wang</i> : Distance Geometry Problem and Algorithm Based on Barycentric Coordinates.....	208
<i>Jijun Liu</i> : On Ill-Posedness and Inversion Scheme for 2-D Backward Heat Conduction.....	227
<i>Yirang Yuan, Ning Du, Yuji Han</i> : Careful Numerical Simulation and Analysis of Migration-Accumulation .....	242
<i>Rongxian Yue</i> : Error Analysis on Scrambled Quasi-Monte Carlo Quadrature Rules Using Sobol Points .....	254
