

Contents

Preface	v
List of Participants	vii
Quantum Maass Forms	1
<i>R. BRUGGEMAN</i>	
\mathcal{L}-Invariant of p-Adic L-Functions	17
<i>H. HIDA</i>	
Siegel Modular Forms of Weight Three and Conjectural Correspondence of Shimura Type and Langlands Type	55
<i>T. IBUKIYAMA</i>	
Convolutions of Fourier Coefficients of Cusp Forms and the Circle Method	71
<i>M. JUTILA</i>	
On an Extension of the Derivation Relation for Multiple Zeta Values	89
<i>M. KANEKO</i>	
On Symmetric Powers of Cusp Forms on GL_2	95
<i>H. H. KIM</i>	
Zeta Functions of Root Systems	115
<i>Y. KOMORI, K. MATSUMOTO & H. TSUMURA</i>	
Sums of Kloosterman Sums Revisited	141
<i>Y. MOTOHASHI</i>	
The Lindelöf Class of L-Functions	165
<i>K. MURTY</i>	

**A Proof of the Riemann Hypothesis
for the Weng Zeta Function of Rank 3 for the Rationals . . . 175**
M. SUZUKI

**Elliptic Curves Arising from the Spectral Zeta Function
for Non-Commutative Harmonic Oscillators
and $\Gamma_0(4)$ -Modular Forms 201**
K. KIMOTO & M. WAKAYAMA

A Geometric Approach to L -Functions 219
L. WENG
