

## CONTENTS

Preface	v
 <b>Chapter I Integral and Pseudodifferential Operators</b>	
§1. Pseudodifferential Operators of Second Order with Sign-Changed Characteristic Form <i>Nguyen Minh Tri</i>	3
§2. A Semilinear Nonclassical Pseudodifferential Boundary Value Problem in Sobolev Spaces $H_{\ell,p}$ , $1 < p < \infty$ <i>Nguyen Minh Chuong and Dang Anh Tuan</i>	15
§3. Singular Integral Operators in Functional Spaces of Morrey Type <i>Lubomira Softova</i>	33
§4. Classification of Integral Transforms <i>Vu Kim Tuan</i>	43
 <b>Chapter II Partial Differential Equations</b>	
§5. Unified Minimax Methods <i>Martin Schechter</i>	75
§6. Some Remarks on Single Conservation Laws <i>Mikio Tsuji and Peter Wagner</i>	91

§7. Iterative Method for Solving a Mixed Boundary Value Problem for Biharmonic Type Equation <i>Dang Quang A and Le Tung Son</i>	103
§8. Numerical Solution to a Non-Linear Parabolic Boundary Control Problem <i>Dinh Nho Hao, Nguyen Trung Thanh and H. Sahli</i>	115
§9. A Class of Solutions to Maxwell's Equations in Matter and Associated Special Functions <i>Peter Massopust</i>	131
§10. On the Cauchy Problem for a Quasilinear Weakly Hyperbolic System in Two Variables and Applications to that for Weakly Hyperbolic Classical Monge-Ampère Equations <i>Ha Tien Ngoan and Nguyen Thi Nga</i>	177
§11. Some Singular Perturbation Problems Related to the Navier-Stokes Equations <i>Makram Hamouda and Roger Temam</i>	197
<b>Chapter III Geometric Analysis</b>	
§12. Monotone Invariants and Embeddings of Statistical Manifolds <i>Le Hong Van</i>	231
§13. Graded Čech Cohomology in Noncommutative Geometry <i>Do Ngoc Diep</i>	255
§14. Sobolev Spaces with Weight on Riemannian Manifolds <i>Nguyen Minh Chuong and Le Duc Thinh</i>	269
<b>Chapter IV Stochastic and Infinite-Dimensional Analysis</b>	
§15. Stochastic Population Control and RSDE with Jumps <i>Situ Rong</i>	281

§16. Noncausal Stochastic Calculus Revisited — Around the So-called Ogawa Integral <i>Shigeyoshi Ogawa</i>	297
§17. Infinite-Dimensional Stochastic Analysis and Foundations of Quantum Mechanics <i>Andrei Khrennikov</i>	321
§18. Noncommutative Trigonometry and Quantum Mechanics <i>Karl Gustafson</i>	341
