

## CONTENTS

Foreword	v
A Combinatorial Identity and Its Application to Gaussian Measures <i>L. Accardi, H.-H. Kuo and A. I. Stan</i>	1
Feynman Formulas for Evolution Equations with Lévy Laplacians on Manifolds <i>L. Accardi and O. G. Smolyanov</i>	13
On the Fock Representation of the Renormalized Powers of Quantum White Noise <i>L. Accardi and A. Boukas</i>	26
Powers of the Delta Function <i>L. Accardi and A. Boukas</i>	33
Dispersion Relations in the Stochastic Limit of Quantum Theory <i>L. Accardi and F. G. Cubillo</i>	45
Integral Representation of Positive Operator on Infinite Dimensional Space of Entire Functions <i>W. Ayed and H. Ouerdiane</i>	53
Comparison of Some Methods of Quantum State Estimation Th. Baier, D. Petz, K. M. Hangos and A. Magyar	64
Entropic Bounds and Continual Measurements <i>A. Barchielli and G. Lupieri</i>	79
Generalized $q$ -Fock Spaces and Duality Theorems <i>A. Barhoumi and H. Ouerdiane</i>	90

Covariant Quantum Stochastic Flows and Their Dilation <i>V. Belavkin and L. Gregory</i>	102
Alicki–Fannes and Hudson–Parthasarathy Evolution Equations <i>A. C. R. Belton</i>	128
Boson Cocycle as the Second Quantization of the Boolean Cocycle <i>A. Ben Ghorbal and F. Fagnola</i>	134
Functional Integrals over Smolyanov Surface Measures for Evolutionary Equations on a Riemannian Manifold <i>Ya. A. Butko</i>	145
Quantum Probabilistic Model for the Financial Market <i>O. Choustova</i>	156
A New Proof of a Quantum Central Limit Theorem for Symmetric Measures <i>V. Crismale and Y. G. Lu</i>	163
On the Most Efficient Unitary Transformation for Programming Quantum Channels <i>G. M. D’Ariano and P. Perinotti</i>	173
Stability Analysis of Quantum Mechanical Feedback Control System <i>P. K. Das and B. C. Roy</i>	181
Markov States on Quasi-Local Algebras <i>F. Fidaleo</i>	196
Some Open Problems in Information Geometry <i>P. Gibilisco and T. Isola</i>	205
Introduction to Determinantal Point Processes from a Quantum Probability Viewpoint <i>A. D. Gottlieb</i>	212

Note on the Time Operator <i>T. Hida</i>	224
On the Dynamical Symmetric Algebra of Ageing: Lie Structure, Representations and Appell Systems <i>M. Henkel, R. Schott, S. Stoimenov and J. Unterberger</i>	233
An Analytic Double Product Integral <i>R. L. Hudson</i>	241
On Generalized Quantum Turing Machine and Its Application <i>S. Iriyama and M. Ohya</i>	251
Dynamics with Infinite Number of Derivatives for Level Truncated Noncommutative Interaction <i>L. Joukovskaya</i>	258
A Logarithmic Sobolev Inequality for an Interacting Spin System Under a Geometric Reference Measure <i>A. Joulin and N. Privault</i>	267
To Quantum Mechanics through Gaussian Integration and the Taylor Expansion of Functionals of Classical Fields <i>A. Yu. Khrennikov</i>	274
Hyperbolic Quantization <i>A. Khrennikov and G. Segre</i>	282
Discrete Energy Spectrum in Discrete Time Dynamics <i>A. Khrennikov and Ya. Volovich</i>	288
Convolution Associated with the Free cosh-Law <i>A. D. Krystek and L. J. Wojakowski</i>	295
A Theorem on Liftings of Statistical Operators <i>J. Kupsch</i>	302

Positive Maps between $M_2(\mathbb{C})$ and $M_n(\mathbb{C})$ . On Decomposability of Positive Maps between $M_2(\mathbb{C})$ and $M_n(\mathbb{C})$ <i>W. A. Majewski and M. Marciniak</i>	308
Thermodynamical Formalism for Quasi-Local $C^*$ -Systems and Fermion Grading Symmetry <i>H. Moriya</i>	319
Micro-Macro Duality and an Attempt Towards Measurement Scheme of Quantum Fields <i>I. Ojima</i>	323
The Lévy Laplacian Acting on Some Class of Lévy Functionals <i>K. Saitô and A. H. Tsoi</i>	330
On the General Form of the Integral-sigma Lemma in Symmetric Fock Space <i>K. Schubert</i>	338
Spatial $E_0$ -Semigroups are Restrictions of Inner Automorphism Groups <i>M. Skeide</i>	348
A Characterization of Poisson Noise <i>Si Si</i>	356
On Two Conjectures in Segal-Bargmann Analysis <i>S. B. Sontz</i>	365
Note on Quantum Mutual Type Entropies and Capacity <i>N. Watanabe</i>	373
