

CONTENTS

List of Contributors	vii
Preface	xv
Chapter 1 Quality Management Systems in Tissue Banking	1
Chapter 2 International Tissue Banking	25
2.1 Radiation sterilisation and the surgical use of bone allografts in Argentina	27
2.2 Bone banking and clinical use of allograft bone in Finland	39
2.3 French national tissue banking activity	67
2.4 The development of tissue banks in Indonesia	77
2.5 Tissue banking in Scotland	87
Chapter 3 Allografts and Bone Substitutes in Orthopaedics and Mandibular Reconstruction	105
3.1 Mandibular reconstruction using bone allografts	107
3.2 Use of allografts in spinal surgery in Singapore	149
3.3 Application of allografts in orthopaedic surgery	169
3.4 Non-cemented acetabular revision: Large defects filled with morsellised bone transplant give poor results	207
3.5 Vascularised fibula in tumour reconstruction	227

Chapter 4	Allografts in the Knee	245
4.1	Allografts in knee ligament surgery: PCL reconstruction by means of bifasciculated Achilles tendon allograft	247
4.2	Anterior cruciate ligament reconstruction with fresh-frozen patellar tendon. Two years minimum follow-up	265
Chapter 5	Allograft Prosthetic Composites	279
5.1	Allograft prosthetic composite reconstructions in revision hip and knee arthroplasties	281
5.2	The use of allograft prosthetic composite (APC) in the proximal tibia after bone tumour resection	313
Chapter 6	Standards for Musculo-Skeletal Tissue Banking	325
	Subject Index	373
