

Contents

Preface		vii
Contributors		xi
Chapter 1	DNA Damage Sensing and Signaling <i>Jamie L. Wood and Junjie Chen</i>	1
Chapter 2	Base Excision Repair <i>Bo Hang</i>	23
Chapter 3	Nucleotide Excision Repair <i>Lei Li</i>	65
Chapter 4	DNA Mismatch Repair: Biological Functions and Molecular Mechanisms <i>Guo-Min Li</i>	87
Chapter 5	Mammalian Homologous Recombination Repair and Cancer Intervention <i>Zhiyuan Shen and Jac A. Nickoloff</i>	119
Chapter 6	Role of Non-Homologous End Joining in the Repair of DNA Double-Strand Breaks <i>Sandeep Burma, Benjamin Chen and David J. Chen</i>	157

<i>Chapter 7</i>	A DNA-damage Response Network of Fanconi Anemia and BRCA Proteins <i>Rong Guo and Weidong Wang</i>	177
<i>Chapter 8</i>	Structure and Function of DNA Repair Proteins: Lesion Recognition <i>Wei Yang</i>	203
<i>Chapter 9</i>	DNA Damage Tolerance and Translesion Synthesis <i>Fang Xu, Yingnian Yu and Wei Xiao</i>	233
<i>Chapter 10</i>	Nucleases in DNA Repair, Replication and Recombination: Flap Endonuclease-1 as a Paradigm <i>Purnima Singh and Binghui Shen</i>	267
<i>Chapter 11</i>	Integrative Genomics and Epigenomics: Application in Cancer Research <i>Maxwell P. Lee</i>	301
<i>Chapter 12</i>	Molecular Epidemiology of DNA Repair and Cancer Susceptibility — A Review of Population-Based Studies <i>Zhibin Hu, Li-E Wang and Qingyi Wei</i>	315
Index		345
