

Contents

Foreword.....	v
1. Introduction.....	1
1.1. Preface of Nanofibers.....	1
1.2. Nanotechnology and Nanofibers.....	3
1.3. Various Ways to Make Nanofibers.....	7
1.3.1. Drawing.....	10
1.3.2. Template Synthesis.....	12
1.3.3. Phase Separation.....	13
1.3.4. Self-Assembly.....	15
1.3.5. Electrospinning.....	15
1.4. Scope of This Book.....	18
2. Basics Relevant to Electrospinning.....	22
2.1. Material Classes.....	23
2.1.1. Polymers.....	23
2.1.1.1. Fundamental Classification of Polymer.....	24
2.1.1.2. Polymer Crystallinity.....	24
2.1.1.3. Polymer Molecular Weight.....	26
2.1.1.4. Glass Transition Temperature (T_g).....	27
2.1.1.5. Synthetic Polymer.....	37
2.1.1.6. Natural Polymer.....	39
2.1.1.7. Copolymer and Polymer Blends.....	41
2.1.1.8. Electrospun Polymer Fiber.....	42
2.1.2. Composites.....	48
2.1.2.1. Composite Reinforcement.....	49
2.1.2.2. Polymer-Matrix Composite.....	50
2.1.3. Ceramics.....	51
2.1.3.1. Crystalline Structure.....	52
2.1.3.2. Amorphous Structure.....	53
2.1.3.3. Ceramic Biomaterials.....	54
2.1.3.4. Nanostructured Ceramics.....	55
2.1.3.5. Carbon.....	60

2.2. Solution Property.....	63
2.2.1. Surface Tension.....	63
2.2.1.1. Effect of Temperature on Surface Tension.....	65
2.2.1.2. Surface Tension of Solvent Mixtures.....	65
2.2.2. Polymer Solubility.....	66
2.2.2.1. Effect of Polymer Structure on Solubility.....	66
2.2.2.2. Gibbs Free Energy.....	67
2.2.3. Viscosity.....	69
2.2.3.1. Solvent Effect on Intrinsic Viscosity.....	71
2.2.3.2. Temperature on Intrinsic Viscosity.....	72
2.2.3.3. Viscometry.....	73
2.2.4. Volatility (Evaporation) of Solution.....	78
2.2.5. Conductivity of Solution.....	80
2.3. Electrostatics.....	81
2.3.1. Electric Field.....	82
2.3.2. Potential Difference and Electric Field Representations.....	83
2.3.3. Surface Charge of Insulator.....	84
2.3.4. Field Ionization.....	85
2.4. Conclusions.....	86
3. Electrospinning Process.....	90
3.1. Polymer Solution Parameters.....	91
3.1.1. Molecular Weight and Solution Viscosity.....	91
3.1.2. Surface Tension.....	96
3.1.3. Solution Conductivity.....	98
3.1.4. Dielectric Effect of Solvent.....	101
3.2. Processing Conditions.....	103
3.2.1. Voltage.....	103
3.2.2. Feedrate.....	106
3.2.3. Temperature.....	108
3.2.4. Effect of Collector.....	108
3.2.5. Diameter of Pipette Orifice / Needle.....	111
3.2.6. Distance Between Tip and Collector.....	112
3.3. Ambient Parameters.....	113
3.3.1. Humidity.....	114
3.3.2. Type of Atmosphere.....	116
3.3.3. Pressure.....	116
3.4. Melt-Electrospinning.....	117
3.5. Creation of Different Nanofibers.....	117
3.5.1. Porous Nanofibers.....	118
3.5.2. Flattened or Ribbon-Like Fibers.....	122
3.5.3. Branched Fibers.....	125

3.5.4. Helical Fibers.....	126
3.5.5. Hollow Nanofibers.....	127
3.5.6. Fiber With Different Compositions.....	130
3.6. Uniformity and Productivity of Nanofiber Webs.....	130
3.6.1. Jet Stability.....	131
3.6.2. Multiple-Spinning Setup.....	132
3.7. Mixed Electrospun Fiber Mesh.....	133
3.8. Patterning.....	135
3.8.1. Cylinder Collector.....	135
3.8.2. A Knife Edge Disk.....	138
3.8.3. An Auxiliary Electrode/Electrical Field.....	139
3.8.4. Parallel Conducting Collector.....	142
3.9. Fiber Yarn and Textile.....	145
3.9.1. Hybrid Fiber Yarns.....	146
3.9.2. Electrospun Fiber Yarn.....	147
3.9.3. Twisted Fiber Yarn.....	148
3.10. Variations to Electrospinning.....	149
3.10.1. Scanning Tip Electrospinning Source.....	150
3.10.2. Nanofiber Interconnections Between Microscale Features..	151
3.10.3. Mass Production Through Needleless Electrospinning.....	152
3.11. Conclusions.....	154
4. Modeling of the Electrospinning Process.....	155
4.0. Nomenclature.....	155
4.1. Introduction.....	157
4.2. Preliminaries.....	158
4.3. Assumptions.....	161
4.3.1. Jet Representation.....	161
4.3.2. Modeling Viscoelastic Behavior.....	162
4.3.3. Coordinate System.....	167
4.3.4. Liquid Incompressibility.....	168
4.4. Conservation Relations.....	168
4.4.1. Conservation of Mass.....	168
4.4.2. Conservation of Momentum.....	170
4.4.3. Conservation of Charge.....	172
4.5. Consideration of Forces.....	173
4.6. Instability.....	174
4.7. Results.....	179
4.8. Future Trends and Challenges.....	188
4.8.1. Jet Flow With Particles.....	189
4.8.2. Core-Shell Flow.....	189
4.8.3. Field-Assisted Flow.....	190

4.8.4. Multi-Jet Flow.....	190
4.8.5. Gas-Assisted Flow.....	190
4.9. Conclusions.....	191
5. Characterization.....	192
5.1. Morphology.....	193
5.1.1. Fiber Diameter.....	193
5.1.2. Pore Size and Porosity.....	199
5.1.3. Surface Contact Angle Measurement.....	206
5.1.4. Others.....	209
5.2. Molecular Structure.....	210
5.2.1. Crystalline Structure.....	210
5.2.2. Organic Group Detection.....	225
5.2.3. Others.....	229
5.3. Mechanical Property.....	234
5.3.1. Single Nanofiber.....	234
5.3.2. Nanofiber Yarn.....	240
5.3.3. Nanofiber Membrane.....	241
5.4. Conclusions.....	245
6. Functionalization of Polymer Nanofibers.....	247
6.1. Polymer Surface Modification.....	247
6.1.1. Introduction.....	247
6.1.2. Physical Coating or Blending.....	248
6.1.3. Graft Copolymerization.....	250
6.1.3.1. Radiation-Induced Graft Copolymerization.....	251
6.1.3.2. Plasma-Induced Graft Copolymerization.....	253
6.1.3.3. Oxidization-Induced Graft Copolymerization.....	255
6.1.4. Plasma Treatment and Chemical Vapor Deposition.....	256
6.1.5. Chemical Treatment.....	257
6.2. Functionalization of Nanofibers for Different Applications.....	261
6.2.1. Introduction.....	261
6.2.2. Functionalization of Nanofibers for Affinity Membrane Application.....	261
6.2.3. Functionalization of Nanofiber for Tissue Engineering Scaffold Application.....	266
6.2.4. Functionalization of Nanofibers for Sensor Application.....	269
6.2.5. Functionalization of Nanofiber for Protective Cloth Application.....	271
6.2.6. Functionalization of Nanofibers for Other Applications.....	273
6.3. Conclusions.....	274
7. Potential Applications.....	275
7.1. Introduction.....	275
7.2. Affinity Membranes.....	279

7.3. Drug Release.....	285
7.4. Tissue Scaffolds.....	291
7.5. Wound Dressing.....	307
7.6. Filter Media.....	309
7.7. Chemical and Biological Protective Clothing.....	311
7.8. Energy and Electrical Application.....	320
7.9. Sensors.....	326
7.10. Composite Reinforcement.....	333
7.11. Conclusions.....	339
Appendix A Glossary of Terms.....	341
Appendix B Useful Websites on Electrospinning and Nanofibers.....	350
Bibliography.....	352
Index.....	381
