

CONTENTS

Nanoparticle Based Approaches	1
Chapter 1. Nanoparticle Metal Oxides for Chlorocarbon and Organophosphonate Remediation <i>Olga B. Koper, Shyamala Rajagopalan, Slawomir Winecki and Kenneth J. Klabunde</i>	3
Chapter 2. Nanoscale Zero-Valent Iron (nZVI) for Site Remediation <i>Daniel W. Elliott, Hsing-Lung Lien and Wei-xian Zhang</i>	25
Chapter 3. Synthesis, Characterization, and Properties of Zero-Valent Iron Nanoparticles <i>D. R. Baer, P. G. Tratnyek, Y. Qiang, J. E. Amonette, J. Linehan, V. Sarathy, J. T. Nurmi, C.-M. Wang and J. Antony</i>	49
Nanostructured Inorganic Materials	87
Chapter 4. Formation of Nanosize Apatite Crystals in Sediment for Containment and Stabilization of Contaminants <i>Robert C. Moore, Jim Szecsody, Michael J. Truex, Katheryn B. Helean, Ranko Bontchev and Calvin Ainsworth</i>	89
Chapter 5. Functionalized Nanoporous Sorbents for Adsorption of Radioiodine from Groundwater and Waste Glass Leachates <i>S. V. Mattigod, G. E. Fryxell and K. E. Parker</i>	111

Nanoporous Organic/Inorganic Hybrid Materials	123
Chapter 6. Nature's Nanoparticles: Group 4 Phosphonates <i>Abraham Clearfield</i>	125
Chapter 7. Synthesis of Nanostructured Hybrid Sorbent Materials Using Organosilane Self-Assembly on Mesoporous Ceramic Oxides <i>Glen E. Fryxell</i>	159
Chapter 8. Chemically-Modified Mesoporous Silicas and Organosilicas for Adsorption and Detection of Heavy Metal Ions <i>Oksana Olkhovyk and Mietek Jaroniec</i>	179
Chapter 9. Hierarchically Imprinted Adsorbents <i>Hyunjung Kim, Chengdu Liang and Sheng Dai</i>	213
Chapter 10. Functionalization of Periodic Mesoporous Silica and Its Application to the Adsorption of Toxic Anions <i>Hideaki Yoshitake</i>	241
Chapter 11. A Thiol-Functionalized Nanoporous Silica Sorbent for Removal of Mercury from Actual Industrial Waste <i>S. V. Mattigod, G. E. Fryxell and K. E. Parker</i>	275
Chapter 12. Amine Functionalized Nanoporous Materials for Carbon Dioxide (CO ₂) Capture <i>Feng Zheng, R. Shane Addleman, Christopher L. Aardahl, Glen E. Fryxell, Daryl R. Brown and Thomas S. Zemanian</i>	285
Nanomaterials that Enhance Sensing/Detection of Environmental Contaminants	313
Chapter 13. Nanostructured ZnO Gas Sensors <i>Huamei Shang and Guozhong Cao</i>	315

- Chapter 14.** Synthesis and Properties of Mesoporous-Based Materials for Environmental Applications 351
Jianlin Shi, Hangrong Chen, Zile Hua and Lingxia Zhang
- Chapter 15.** Electrochemical Sensors Based on Nanomaterials for Environmental Monitoring 401
Wassana Yantasee, Yuehe Lin and Glen E. Fryxell
- Chapter 16.** Nanomaterial Based Environmental Sensors 439
Dosi Dosev, Mikaela Nichkova and Ian M. Kennedy
