

Gene Dresselhaus studied physics at the University of California at Berkeley where he worked with Kittel and Kip on the early cyclotron resonance experiments on semiconductors and semimetals. His early postdoctoral work was at the University of Chicago and then a junior faculty position at Cornell University for four years. The major part of his professional career has been at MIT, first at the MIT Lincoln Laboratory and later at The Francis Bitter National Magnet Laboratory. He is a Fellow of the American Physical Society.
