

# Contents

Chapter 2	Basic Group Theory	1
Chapter 3	Group Representations	11
Chapter 4	General Properties of Irreducible Vectors and Operators	27
Chapter 5	Representations of the Symmetric Groups	35
Chapter 6	One-Dimensional Continuous Groups	43
Chapter 7	Rotations in 3-Dimensional Space — The Group $SO(3)$	45
Chapter 8	The Group $SU(2)$ and More About $SO(3)$	59
Chapter 9	Euclidean Groups in Two- and Three-Dimensional Space	73
Chapter 10	The Lorentz and Poincaré Groups, and Space-Time Symmetries	83
Chapter 11	Space Inversion Invariance	97
Chapter 12	Time Reversal Invariance	103
Chapter 13	Finite-Dimensional Representations of the Classical Groups	107

---

There are no problems in Chapter 1.
