

Subject Index

A

action-angle variables, 37, 38, 46, 52
Aristotle, 178, 183
Arnold tongue, 13, 204, 207
attenuation zone (AZ), 145, 148
AUTO, 98
averaging, 31-49, 74-76

B

backbone curves, 163, 165
bearings, history, 178, 179, 180
belt drive, 178
bow, musical, 175, 177
Brillouin zone, 123, 127

C

Casimir, 66,68
cave paintings, 179, 181, 182
central pattern Generator, 103
chaos, 119-121, 132, 135, 191-195
Chladni figures, 186, 188
coefficient of friction, 184
coupled oscillators, 4, 5, 103, 106, 122,
125, 126, 145, 162
crayon, 178-179, 182

D

damping, 190-191
destabilizing effect of friction, 191
dimensional collapse, 191, 192
DsTool, 110
Duffing oscillator, 34

E

earthquakes, 190
electric friction-machine, 181, 183
elliptic functions, 35-40, 54-58

excitable oscillators, 103-105
existence of solutions, 185-186

F

fire drill, 170
fire making, 169-170
FitzHugh Nagumo equations, 90
friction drive, 170
friction, coefficient of, 184

G

Galileo Galilei, 186
goblet, fingered, 186
gyrostat, 60-65, 76, 84, 87

H

harmonic balance, 209
Herodotus, 175, 178
history of friction, 168-202
Hodgkin Huxley equations, 90
Hopf bifurcation, 91

I

impact laws, 184
impact loading, 135
internal resonance, 152

K

KAOS, 98

L

Lascaux, caves of, 179, 181, 182
Leonardo da Vinci, 178, 179, 184
Lie transforms, 26-34
limit cycle, 1-6, 40-45, 213
Lindstedt's method, 13, 20

logarithmic decrement, 190
 lubrication, 178
 Lyapunov exponent, 204, 192
 Lyapunov multiplier, 6

M

MACSYMA, 25, 33, 39, 40, 92
 Maple, 209
 Mathematica, 33, 150, 152
 Mathieu equation, 203
 Matlab, 110
 mean damping, 17
 Mo Ching, 183
 modal trading, 128
 musical bow, 175, 177
 musical sands, 189

N

Newton's Laws of Motion, 183
 noise, 175, 187, 189
 nonlinear normal mode (NNM), 144, 145,
 156, 163, 164
 normal Form, 91, 92

P

Pade approximant, 1, 13-15, 20
 pencil, 181
 perpetual motion, 183
 perturbation method, 7-10, 204, 212
 phase-lock, 78, 79, 107-109, 111-113, 115
 pitchfork bifurcation, 109
 Poincare map, 213
 proper orthogonal decomposition (POD), 121,
 130-132

Q

quasi-periodic localization, 129
 quasi-periodic Mathieu equation, 203

R

Raman waves, 187
 Rayleigh dissipation function, 185
 relaxation oscillation, 1, 2
 resonance capture, 77-79
 roads, development of 175, 176
 rollers, 171, 178
 rotation number, 106, 109, 110

S

saddle-node bifurcation, 92, 106, 114
 satellite paradox, 191
 separatrix crossing, 77
 skis, 171, 172
 sledge, 171, 172, 178
 snow, 189
 solitons, 119, 127, 136, 139, 140
 sonorous sands, 189
 spouting bowl, 175
 squeak, 187
 squeal, 175, 187
 standing waves, 146
 state-variable friction laws, 190
 stick-slip, 185, 187, 191, 192
 structural stability, 98
 synchronization, 46

T

Takens-Bogdanov bifurcation, 90, 91, 99
 Thales, 181
 Toda lattice, 127
 Toda soliton, 136, 139, 140
 trapping region, 107, 108, 111
 travelling waves, 116, 127, 136
 turbine blades, 191

U

uniqueness of solutions, 185, 186

V

van der Pol oscillator, 1, 6, 20

vibrations induced by friction, 175, 184, 186-189

W

wheel, 171, 173-175, 192
