

Contents

Chapter 1: Reflection and Refraction

1.1 Main Laws and Formulae

1.1.1 The laws of reflection and refraction	1
1.1.2 Sign convention	2
1.1.3 Reflection and refraction on a spherical surface	3
1.1.4 Matrix and vector form for light rays	4
1.1.5 Reflection and refraction as electromagnetic waves propagation	8
1.1.6 Harmonic waves. Principle of superposition. Complex notation	9

1.2 Problems

1.2.1 A simple concave mirror	13
1.2.2 A simple convex mirror	15
1.2.3 A refracting surface	17
1.2.4 Prism 1	18
1.2.5 A reflecting plate	20
1.2.6 Prism 2	22
1.2.7 A refracting plate	23
1.2.8 Prism 3	25
1.2.9 A hemisphere	27
1.2.10 Plane and spherical surfaces	28
1.2.11 Prism 4	31
1.2.12 A sphere	34
1.2.13 A moving mirror	36
1.2.14 A transparent plate	38
1.2.15 A wave guide	41

1.2.16 Two mirrors	44
1.2.17 Three mirrors	47
1.2.18 Cavity 1	51
1.2.19 Cavity 2	54
1.2.20 Cavity 3	56
1.2.21 Fresnel formulae	59

Chapter 2: Lenses

2.1 Main Laws and Formulae

2.1.1 Preliminary definitions, restrictions and conventions	63
2.1.2 Formulae for the powers P and focal lengths f	65
2.1.3 Thick and thin lenses equations: the Gaussian formulae	66
2.1.4 Thick and thin lenses equations: the Newtonian formulae	67
2.1.5 Spherical and chromatic aberration	67
2.1.6 The matrix form for a thin lens	69

2.2. Problems

2.2.1 Simple thin biconvex lens	69
2.2.2 Simple thin biconcave lens	71
2.2.3 Simple thick biconvex lens	72
2.2.4 Thin lens 1	73
2.2.5 Thin lens 2	75
2.2.6 Thick lens	77
2.2.7 Thin lens 3	79
2.2.8 Lens and mirror	80
2.2.9 Doublet	82
2.2.10 Lens and prism	84
2.2.11 Coaxial system 1	85
2.2.12 Coaxial system 2	86
2.2.13 Coaxial system 3	88
2.2.14 Coaxial system 4	89
2.2.15 Coaxial system 5	91
2.2.16 Principal planes	93
2.2.17 Two lenses and a prism	94
2.2.18 Longitudinal and transverse spherical aberrations	96
2.2.19 Image intensity	99

2.2.20 Focal length of a thick lens	100
2.2.21 Three coaxial lenses	102

Chapter 3: Polarization

3.1. Main Laws and Formulae

3.1.1 Linearly polarized light	107
3.1.2 Elliptically polarized light	108
3.1.3 Reflectivity and refractivity	111
3.1.4 Birefringence	114
3.1.5 Vectors for forms of polarization and matrices for polarizers and retarders	117

3.2 Problems

3.2.1 Natural light	122
3.2.2 Linearly polarized light	125
3.2.3 Half-wave retarder 1	127
3.2.4 Retarders	129
3.2.5 A calcite plate	131
3.2.6 A calcite prism	133
3.2.7 A quartz prism	134
3.2.8 Two calcite prisms 1	136
3.2.9 Two calcite prisms 2	138
3.2.10 Two polarizers	140
3.2.11 Three polarizers	142
3.2.12 A half-wave plate	144
3.2.13 A quarter-wave plate 1	146
3.2.14 A quarter-wave plate 2	148
3.2.15 A quarter-wave plate 3	150

Chapter 4: Interference

4.1 Main Laws and Formulae

4.1.1 Superposition of waves	153
4.1.2 Interference by a thin homogeneous dielectric film	156

4.2 Problems

4.2.1 A thin film on a lens	157
-----------------------------	-----

4.2.2 A wedge-shaped soap film	158
4.2.3 Newton's rings 1	160
4.2.4. The Newton's rings 2	162
4.2.5 Michelson 1	164
4.2.6 Michelson 2	165
4.2.7 Multiple-beam interference	169
4.2.8 Fabry-Perot interferometer 1	172
4.2.9 Fabry-Perot interferometer 2	174
4.2.10 Fabry-Perot interferometer 3	176
4.2.11 Fabry-Perot interferometer 4	179

Chapter 5: Diffraction

5.1 Main Laws and Formulae

5.1.1 Introduction	183
5.1.2 Fraunhofer diffraction from one or N linear slits	184
5.1.3 Fraunhofer diffraction from a circular aperture	186
5.1.4 Fresnel diffraction: the zones and the integrals	189

5.2 Problems

5.2.1 Single slit	193
5.2.2 Young 1	196
5.2.3 Young 2	198
5.2.4 Young 3	199
5.2.5 Young 4	202
5.2.6 Young 5	204
5.2.7 Young 6	205
5.2.8 Young 7	206
5.2.9 Young 8	208
5.2.10 Young 9	210
5.2.11 A five-slits grating	212
5.2.12 Grating 1	214
5.2.13 Grating 2	214
5.2.14 Grating 3	216
5.2.15 Airy disk 1	218
5.2.16 Airy disk 2	219
5.2.17 Fresnel zones 1	220

5.2.18 Fresnel zones 2	222
5.2.19 Fraunhofer and Fresnel diffraction for a single-slit	224
5.2.20 Fresnel diffraction at an edge	227

Chapter 6: Photons and Moving Light Sources

6.1 Main Laws and Formulae

6.1.1 Introduction	231
6.1.2 The blackbody radiation	232
6.1.3 The photoelectric effect	233
6.1.4 Relativistic relations for linear momentum and energy of a particle and a photon	234
6.1.5 The Compton's effect	236
6.1.6 Light Doppler's effect	237

6.2 Problems

6.2.1 Planck 1	244
6.2.2 Planck 2	247
6.2.3 Planck 3	249
6.2.4 Photons 1	251
6.2.5 Photons 2	253
6.2.6 Einstein 1	254
6.2.7 Einstein 2	255
6.2.8 Compton 1	256
6.2.9 Compton 2	257
6.2.10 Compton 3	259
6.2.11 Doppler 1	262
6.2.12 Doppler 2	264
6.2.13 Doppler 3	265
6.2.14 Bradley	267

Appendix 1: Fourier Series and Integrals	271
---	-----

Appendix 2: Superposition of Plane Harmonic Waves	277
