

CONTENTS

Preface	v
Ultrafast Dynamics of Nano and Mesoscopic Systems Driven by Asymmetric Electromagnetic Pulses <i>A. Matos-Abiague, A. S. Moskalenko and J. Berakdar</i>	1
One-Dimensional Non-Linear Oscillators as Models for Atoms and Molecules under Intense Laser Fields <i>A. Wadehra and B. M. Deb</i>	21
Experimenting with Topological States of Bose-Einstein Condensates <i>C. Raman</i>	35
Laser Cooling and Trapping of Rb Atoms <i>S. Chakraborty, A. Banerjee, A. Ray, B. Ray, K. G. Manohar, B. N. Jagatap and P. N. Ghosh</i>	51
Pair-Correlation in Bose-Einstein Condensate and Fermi Superfluid of Atomic Gases <i>B. Deb</i>	57
Properties of Trapped Bose Gas in the Large-Gas-Parameter Regime <i>A. Banerjee</i>	69
A Feynman-Kac Path Integral Study of Rb Gas <i>S. Datta</i>	89
Mean Field Theory for Interacting Spin-1 Bosons on a Lattice <i>R. V. Pai, K. Sheshadri and R. Pandit</i>	105

Mixed Internal-External State Approach for Quantum Computation with Neutral Atoms on Atom Chips <i>E. Charron, M. A. Cirone, A. Negretti, J. Schmiedmayer and T. Calarco</i>	121
Ultrafast Pulse Shaping Developments for Quantum Computation <i>S. K. Karthick Kumar and D. Goswami</i>	133
Quantum Information Transfer in Atom-Photon Interactions in a Cavity <i>A. S. Majumdar, N. Nayak and B. Ghosh</i>	143
Liouville Density Evolution in Billiards and the Quantum Connection <i>D. Biswas</i>	159
MRCPA: Theory and Application to Highly Correlating System <i>K. Tanaka</i>	169
Calculation of Negative Ion Shape Resonances Using Coupled Cluster Theory <i>Y. Sajeev and S. Pal</i>	187
Optical Frequency Standard with Sr^+ : A Theoretical Many-Body Approach <i>C. Sur, K. V. P. Latha, R. K. Chaudhuri, B. P. Das and D. Mukherjee</i>	199
Fast Heavy Ion Collisions with H_2 Molecules and Young Type Interference <i>L. C. Tribedi and D. Misra</i>	209
Estimation of Ion Kinetic Energies from Time-of-Flight and Momentum Spectra <i>B. Bapat</i>	229
Third-Order Optical Susceptibility of Metal Nanocluster-Glass 28 Composites <i>B. Ghosh and P. Chakraborty</i>	237

Study of Atom-Surface Interaction Using Magnetic Atom Mirror

A. K. Mohapatra
