

Contents

<i>Preface</i>	v
1. Observational Techniques	1
1.1 The GC Across the Electromagnetic Spectrum	1
1.1.1 Radio Wavelengths	2
1.1.2 Far-Infrared Wavelengths	7
1.1.3 Near- and Mid-Infrared Wavelengths	12
1.1.4 Optical Wavelengths	16
1.1.5 X-Ray Energies	17
1.1.6 γ -Ray Energies	20
1.2 NIR Imaging Through the Atmosphere	22
1.3 Speckle Imaging	26
1.3.1 The Knox-Thompson Method	30
1.3.2 The Bispectrum Analysis	31
1.3.3 Seeing Calibration of Fourier Data	32
1.3.4 The Shift-and-Add Algorithm	33
1.3.5 Speckle Spectroscopy	37
1.3.6 Speckle Instrumentation	39
1.3.6.1 SHARP	40
1.3.6.2 NIRC	41
1.4 Single Telescope Adaptive Optics	42
1.4.1 Adaptive Optics Imaging	42
1.4.2 Adaptive Optics Spectroscopy	49
1.4.3 Adaptive Optics Instrumentation	51
1.4.3.1 NAOS/CONICA	51
1.4.3.2 NIRC2	54
