

Normas J M Horing is a Professor of Physics and Engineering Physics at Stevens Institute of Technology, Hoboken, New Jersey, USA. He received his PhD degrees at Harvard University, working with Professor Julian Schwinger. His positions as research physicist include the MIT National Magnet Laboratory and Lincoln Laboratory, US Naval Research Laboratory and the Cavendish Laboratory of the University of Cambridge, UK, as well as the Stevens Institute of Technology. He is well known internationally for his research on theoretical condensed matter physics, in particular the quantum theory of solid state plasmas, high magnetic field effects and transport properties. As leader of semiconductor theory research at Stevens' Quantum Electron Physics and Technology Center, he has published widely on the properties of submicronnanostructures as well as bulk semiconductors.
